WILL URGE FOR BETTER TRAIL TO WATERTON

The adjourned meeting of representatives of the various boards of trade in the district was held at Pincher Creek yesterday afternoon, and was attended by delegates from Coleman, Blairmore, Waterton, and Pincher Creek.

The meeting was presided over by Mr. L. L. Morgan, president of the Blairmore board, while Mr. W. L. Rippon, of Coleman, acted as secretary.

Considerable discussion ensued as to whether or not the Pincher to Waterton trail should be considered in preference to the Pincher Station to Macleod, Coleman, and the completion of the Red Trail to Macleod, than in a better road to the Park. At the present time, the Red Trail is gazetted as a highway and as soon as finances will permit, it is felt that that section of the highway from Pincher Station to Macleod will be completed up to standard as an all-weather highway. But the trail from Waterton to Pincher Station is not yet a gazetted highway and has been maintained by the farmer ratemakers of the Municipal District of Kerr, who have now decided that they can no longer keep up the trail and have asked the government to assist.

Because of the condition of this trail, considerable traffic that would have found a way through Pincher Creek and the Crows' Nest Pass has been diverted through Cardston, Macleod and Lethbridge, and because of this fact, Mr. Morgan and other representatives of the Pincher Creek board felt that the gazetting of this road should be a first consideration of whatever organization should be formed at this time. Considerable tourist traffic had emanated from Waterton Lakes during the past season, most of which had come in from the States through Glacier and the Carway, and practically all of this traffic had to come out via Cardston to Macleod and Calgary that would have preferred the "Crows' Nest" Windermere to Banff and Calgary route were it not for the impassable condition of the Pincher to Pincher trail.

Upon motion it was decided to form the Crows' Nest Pass—Waterton Lakes Trail Association, with the following executive:

Honorary president—Mr. McPherson, minister of public works.

Honorary vice-presidents—P. M. Christopher, M.L.A., and E. Cooke, M.L.A.

President—H. Bossenberry, Pincher Creek.

Vice Presidents—A. M. Morrison, Coleman; L. L. Morgan, Blairmore; E. Haug, Waterton Lakes; Frank Smith, Hillcrest; William Kerr, Bellevue; C. H. Morrison, Cowley; A. M. Demmire, Lundbreck; W. Laidlaw, Pincher Station.

Secretary-treasurer—A. L. Freebairn, Pincher Creek.

The following resolution was passed by the meeting before adjournment: "That this Association draft a resolution to the minister of public works and the chairman of the highways commission, asking that the trail from Pincher Creek to Waterton Lakes be gazetted as a highway at the first session of the house, and that engineers be sent immediately to locate this road in order that construction of a standard highway could commence in the early spring."

Dancers!

A PLEASANT SURPRISE

HARVEY and HIS RED-TUX BOYS
enroute through B.C., are enabled by a change in schedule to hold

A DANCE
in the MOOSE HALL, BLAIRMORE on

JOHN A. KERR PURCHASES THE KAFOURY BUSINESS

During the week a deal has been finalised, through which Mr. John A. Kerr takes over the stock and premises of F. S. Kaoury, known better as The Blairmore Trading Co.

Mr. Kerr has already started to rearrange the stock and to move his goods' furnishings stock to the new store and by Saturday will be open with a great slaughter sale, particulars of which may be seen on large bills to be issued tomorrow.

MINISTERIAL ASSOCIATION TO MEET AT COWLEY

The Crows' Nest Pass Ministerial Association will meet at Cowley on Monday next at 2 p.m., at which the Rev. Mr. Bunt, of Pincher Creek Anglican church, will present a paper on the "Creative Activity of God."

BLAIRMORE HIGH SCHOOL LITERARY SOCIETY FORMED

A meeting of the students of the Blairmore high school was held on Friday afternoon, October 21st, for the purpose of organizing the Blairmore High School Literary Society.

The following officers were elected on a vote by ballot, which was correctly taken:

Honorary presidents—Mr. W. H. Chappell, Jr., Rev. A. D. Currie, Rev. Father Harrington and Rev. J. W. Smith.

President—Frank Johnson.
Vice-President—Alice Smith.
Secretary-treasurer—Jean Greig.
Editors—Fred McDowell and Jean Greig.

The following students from each grade were elected as class representatives:

Grade IX—Ruby Howe and Alice Hamilton.
Grade X—Eileen Ivey and Margaret Wolstenholme.

Grade XI—Bessie Crowder and Lena Fraser.

These will form a committee, with the officers, to arrange programmes for the ensuing term.

Following the ballot, a short play of three acts was presented by the students.

The aim of the society is to promote literary, musical and social activities in the school and an interesting series of programmes is anticipated. The students are considering the setting of some definite objective for which to work—F. McDowell, Press Rep.

AJAX COAL—We are having a car of the above coal coming in from Medicine Hat the last of this week. Those needing any better place their orders now, as it will come 75 cents cheaper if taken from off the car. Phone 267—W. M. BUSH.

commission, asking that the trail from Pincher Creek to Waterton Lakes be gazetted as a highway at the first session of the house, and that engineers be sent immediately to locate this road in order that construction of a standard highway could commence in the early spring."

PYTHIAN SISTERS' SALE AND WHIST DRIVE NOVEMBER 2nd

Silk Stockings

Have stockings in the very newest shades; you old or faded stockings are very little value. In half an hour with fifteen cents' worth of Diamond Dyes, but use dyes, not anesthetic tints. And be sure they're true dyes.

Try a pair tonight! Use Diamond Dyes, and on one will dream they were thined at home. And you can do real dyes with just as perfect results. And you will just use the true Diamond Dyes.

Free: Why not ask your druggist for the very useful Diamond Dye Catalogue. Valuable suggestions, easy directions, nice decorative sample colors. Or write for free copy of Color Craft, a big illustrated book sent postpaid—address: Diamond DYES, Dept. N13, Windsor, Ontario.

Diamond Dyes

Just Dip to TINT, or Boil to DYE

WORLD HAPPENINGS BRIEFLY TOLD

Languages of all the races of the world will be preserved on photographic records for posterity when a unique collection being made for the new museum of languages, Paris, is completed.

The negotiations in connection with the commercial treaty between Canada and Czechoslovakia are now so far advanced that a definite conclusion is expected during the course of the coming winter.

Sir Thomas Lipton completed his sixth visit to the United States when he arrived at New York recently, on the Leviathan with a challenge to American yachts for races in 1929. He made his first voyage in 1887.

A Toronto publishing house announces the publication next month of a book entitled "The Message of the Carillon and Other Addresses," by Premier Mackenzie King, with simultaneous publication in London and New York.

To study means of protecting the civilian population against the effects of chemical warfare, the Geneva International Red Cross Committee is arranging a meeting of international experts at Brussels, Belgium, January 16, 1928.

More telegrams of congratulation and well wishes are sent by Jewish people than any other group in the United States, the Western Union Telegraph Co. has found out, in compiling a record of messages of a non-religious nature.

The Prince of Wales and Premier Stanley Baldwin have accepted invitations to guests of the Canada Club at a dinner to be given in London, by the club, November 21. This is regarded as a sort of final wind-up celebration of the summer four of His Royal Highness and the Premier in Canada.

The Toronto Telegram says: "Canada's next royal visitor is likely to be the Duke of York, for an authority informs us 1929 will see a visit of the second son of Their Majesties to Canada, when it is understood among his public duties will be the opening of Toronto's 'Royal York' a new hotel."

Westerners Receive Medical Degree. Four western candidates have successfully passed the October examinations of the medical council of Canada, permitting them to practice in any province in Canada. Thirty candidates successfully passed the examination. The westerners are: A. L. Euell, Vancouver; F. M. Jones, Victoria; W. H. Mum, Summerland, B.C.; and C. A. Ryan, Vancouver.

Germany is represented for the first time since 1914 at the exhibition of the London Salon of Photography.

Argentina is entering a new era of prosperity, caused by increased world demand for its products.

Once Famous Liner Is Being Wrecked

Empress of Japan Beasted Fine Equipment Than Many Modern Ships.

The hammers and levers of a wrecking crew are making fast work of all that remains of the liner Empress of Japan, one of the blue ribbon ships of the North Pacific.

For several years the old ship, which was launched in a British ship yard 37 years ago, has been lying at anchor in Burrard Inlet. Her once proud and majestic frame of clipper design has gradually been converted into a bare skeleton of steel, and in a few weeks even this will have gone to Japanese yards to be fabricated into material for new ships. It is said that the man who bought the vessel from the Canadian Pacific, Mr. J. which operated the vessel so many years in the trans-Pacific trade, had already made a fortune through the removal and sale of the vessel's fittings. In these days of rapid production few ships are given the fine equipment such as the Empress of Japan boasted. Every rivet was a perfect job, the plates were sound, not a door in the bulkheads but swung freely and shut tightly as when the ship was new—all this, when the wrecking crew began its work of destruction.

The Empress of Japan had friends all over the world. Tens of thousands of people who were carried as passengers in the days of her prime remember the ship with pride that is shared by the scores of seafarers men who made the ship their headquarters for many years.

The Empress of Japan was one of the first ships to dip into the harbor of India when sold to the Gaikwar of Baroda, during the war and served as a hospital ship for Indian troops, later being returned to the merchant service. The Empress of China was lost on a reef off the Japanese coast some thirteen years ago.

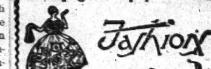

Early Home Of Mankind

Find Skull In Africa Of Man Who Lived 25,000 Years Ago.

A male skull, believed to be a perfect specimen of the type of men who existed about 25,000 years ago, has been brought to the United States by Dr. George L. Collier, professor of anthropology at Beloit College.

Dr. Collier, who represented the Canadian Museum of Beloit, to African excavations, borrowed the skull from M. A. Dubrois, its French discoverer for examination by United States scientists. This and other recent discoveries in Africa provide convincing proof, said Dr. Collier, that Africa and not Asia, was the early home of mankind.

Winnipeg Newspaper Union

A New Bloomer Dress

This attractive blomer dress has a two-piece skirt gathered to a yoke opening at the back. The round yoke is finished with a ruched band and there are pointed cuffs on the short sleeves. The bloomers have elastic draw-through the top and leg casings. I have them in sizes 4 to 12. Price size 4 requires 2½ yards 36-inch, or 1½ yards 54-inch material. Price 20 cents the pattern.

Manitoba Aviation League

Organization Is Expected To Give a New Impetus To Flying In the Province

The keen public interest in aviation, and the fact that Winnipeg, will, in time, become one of the most important airports in this country, has resulted in the formation of the Aviation League of Manitoba. With leading citizens serving as officers of the organization, and on the Board of Governors, it is expected that the League will give a renewed impetus to flying in this province. The officers of the League follow: J. A. Richardson, president; D. C. Coleman, vice-president; H. P. Craig, secretary; Board of Governors: Edward Anderson, T. C. Anderson, W. R. Chubb, J. B. Coyer, P. G. DuVal, Charles Gray, W. H. Gardner, J. Hunter, S. N. Jones, W. A. Kingsland, A. W. McLennan, W. McCurdy, Hugh Oster, H. P. Parker, C. S. Riley, A. Sully, W. A. Strath, Mayor R. H. Webb, and F. O. Woodward.

The object of the League, as set forth in the constitution is: To foster, encourage, and advance the science of aeronautics; to kindle and keep alive interest in man and legitimate aviation; to encourage and assist scientific groups or institutions in promoting the science of aeronautics, and aerial navigation, and to promote uniform laws, flying regulations, and air routes. To prepare and distribute general and scientific aeronautical data pertaining to atmospheric conditions, flying fields and air routes, to encourage and organize volunteer aeronauts, so as to help the young men, which they can receive practical and theoretical instruction to prepare them for active participation in aviation, to do all such other lawful things as are incidental or conducive to the attainment of the above objects.

In keeping with the work of the League, Major-General J. H. MacBrien, C.B., C.M.G., D.S.O., addressed the Canadian Club at luncheon on the Royal Alexandra Hotel on Tuesday, October 18.

Wheat Rust Report

Much Data Obtained Which Prove Valuable

A report covering the years of research into the wheat rust problem of Western Canada has been completed by J. H. Craigie, of the Dominion Rust Research Laboratory of Manitoba Agricultural College, and has been forwarded to the National Research Council at Ottawa.

While no announcement of the results of the research will be made until the council has examined the report, it was learned authoritatively that Mr. Craigie's experiments will mark a forward step in the fight of western farmers to overcome the great crop calamity.

Mr. Craigie has been at work for two years or more on his researches, but only in recent weeks has he been able to reach definite conclusions.

The report will be made public in a few weeks' time.

Hill "60" For Sale

The news that "Hill 60" is to be put up for sale will raise strange memories in the minds of those who have but to hear its name to see themselves again in the Ypres Salient. To those who followed with anxious hearts the daily bulletins it was, and is, a name of illomen, but those who were spared it from the tunnelled earth, swept over it in triumph, lost it and took it again, were buried in it, were wounded on it, and in more than one sense fed upon it, will remember it with a queer affection.

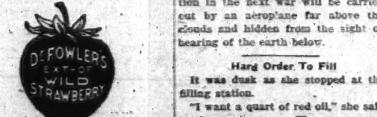

One way to teach good manners to the children is to give them an opportunity of seeing some.

Spain's trade with France continues to grow.

DYSENTERY WAS SO BAD BECAME ALARMED

Mr. Wallace Pepper, R.N., No. 1, St. George, Ont., writes: Last week I was taken with dysentery. I lost my appetite, and had such severe pains in my abdomen that I was very faint. I had to give up my work for a week.

I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I eat two helpings."

This wonderful and incomparable remedy has been on the market for the past 60 years; put up only by The T. Minburn Co., Limited, Toronto, Ont.

Hard Order To Fill

It was dusk as she stopped at the filling station.

"I want a quart of red oil," she said to the service man. The man gasped and hesitated. "Give me a quart of red oil," she repeated.

"A 4-oz. quart of red oil?" he stuttered.

"Certainly," she said, "my tall light is out!"

ROYAL HUNTERS

SUNDAY SCHOOL LESSON

OCTOBER 30

ANOS DENOUNCES SIN

Golden Text: "Seek good, and not evil, that ye may live; and so Jehovah, the God of hosts, will be with you, as ye say."—Amos 5:14.

Lesson: Amos 2:4 to 3:15.

Devotional Reading: Psalm 15:3-5.

Explanation and Comment

1. "Judah's Sin and Threatened Punishment," verses 25-35.—"Then saith Jehovah," were the words with which Amos prefaced his denunciation of sin, for he rightly believed that he was addressing the righteous God. "For three transgressions, yea, for four (the Hebrew way of saying 'of accumulated transgressions), I will not bear away the punishment thereof." Jehovah, the Southern Kingdom, was sinned over and over again; it was not only one act, but several, repeated evil acts and called for judgment. The cause of these sins was that they had rejected the law of God, the teaching of the prophets and priests, and had not kept his commandments (the definition, legal enactments, etc., of his law). They had sinned in the minds of the worshippers, and therefore are sure to disappoint his hopes."—Punishment.

2. "The Land of the Sons of Judah, and the Palaces of Jerusalem." Judah would share the doom of the neighboring nations upon which the prophet had pronounced God's judgment in the earlier part of his address.

Start On Long Hike

Twin Brothers Walking From London, England, to Karachi, India

A 6,000 miles' tramp with empty pockets in search of the romance of travel is the program of two young Englishmen who started to walk from London to Karachi, in India.

They are twin brothers, Donald and Douglas Burton, and their route will take them through France, Italy, Yugoslavia, Bulgaria, Turkey, Arabia and Persia.

"It is to be a real 'roughing it' tramp," they said before starting, "because we are not going to take any money. We are English by birth and parents though for the last four years we have lived in Canada and New Zealand."

The twins will not be completely "broke" until they get to France, for they have just enough cash to take them across the Channel.

Says Greenland Once Tropical

Danish Explorer Has Evidence To Prove His Claim

Lauge Koch, Danish explorer, has returned to Copenhagen from an exploration of Greenland with evidence that Greenland was once a tropical country.

Koch brought back the largest collection of specimens ever taken from Greenland, eight tons of fossils, plants and animals showing three geological periods. Some specimens indicated that at one time there was a tropical life on Greenland, such plants as palms growing in abundance. Signs of numerous hot springs and rich animal life were found.

Safe Enough For Gold

Recent Shipment Shows Air Transportation Considered Fairly Reliable

Many persons who are doubtful about the safety of ordinary travel in airplanes may be reassured by the freedom with which air transportation is being used for shipping gold.

One recent consignment of \$5,000,000 in that metal was taken from London to Amsterdam in an airplane as a part of the regular business of an air express line. Of course, the gold was insured, but the fact that the rate of insurance charged was moderate enough to make the use of the air route good business is in itself decidedly satisfactory to those who are watching the progress of human flight.

No one sends large sums, in gold or silver, by air transportation unless they are reasonably safe.

Takes Photos In Fog

Inventor Of Television Gets Every Detail With Complete Clearness

Photographs showing every detail of the landscape with complete clearness have been taken in an opaque fog, according to J. Baird, the young Scotch inventor of television. He recently exhibited before the British Association in London such photographs and a camera, equipped with his television ray. The special photographic plates are sensitized to the infra-red spectrum-ray which are invisible to the human eye, and by this means the camera can record pictures through the thickest cloud. Baird predicts that photography and observation in the air will be carried out by an aeroplane far above the clouds and hidden from the sight of bearing of the earth below.

They will be coal burners.

This is good news for us English, whose wealth and prosperity have been founded on our coal deposits.

England is coming again, into her own in the bunkers of German ships.

May Become Popular

Asserting his right to cross the Atlantic in safety a pedestrian in Southampton, England, appeared with a miniature, but noisy, motor horn attached to his walking stick. He sounded warning blasts to the more fortunate ones in automobiles when he was about to cross.

The police interpreters were nonplussed, and eventually several professors of modern languages admitted themselves beaten.

At this juncture an idea occurred that broadcasting might be of service. Listeners to the nearest broadcasting station were accordingly acquainted with the circumstances, and the luckless pedestrian was instructed to speak into the microphone. The distressing appeal was heard by a fellow countryman (says a writer in *The Wireless World*), with the result that the captive was identified as a Lander. Explanations satisfied the police and he was allowed to depart.

In five months of this year, 10,000 branches of Canadian banks were opened and 21 closed.

"That music makes me ill. I shall leave here soon."

"Why not at once?"

"Because I have paid for this dance."—Journal Amusant, Paris.

AFTER ALL

There's Nothing To Equal

Zam-Buk

FOR THE SKIN!

Will Found German Colony

Many Former Aristocrats Plan To Settle in Canadian West

A party of landed German aristocrats have been looking around for land in the St. Walburg district, Saskatchewan.

The names of several of the Germans are familiar as being prominent in the German war news, and if their decision is favorable concerning the land in the district, a German settlement will spring up, comprising some of Germany's former nobility.

Dr. Smidt von Seeburg, of Berlin, who organized the party, has himself taken a homestead in the St. Walburg district.

Count Otto von Dem Hagen, from Dresden, and Herr Carl Schulte, graduate of the University of Greifswald, the oldest German university, are leaving for Germany, where they will make a report on the land conditions found there. It is their intention to return in the spring, bringing with them their families and a large party of relatives.

Count von Dem Hagen was territorial governor of German East Africa before the war.

Others in the party were Count von Bulow, nephew of Prince von Bulow, who was German chancellor before the war, Gunther von Arnim, son of General von Arnim, and others of the blue blood of Germany.

World's Record Wheat Yield

74,000 Bushels From 1,300 Acres in Alberta

C. S. Noble, of Nobleford, Alberta, a former American, has this year harvested his own world's record in wheat growing made in 1915. In that year he grew 54,320 bushels of wheat on 1,000 acres, an average of 51.3 bushels per acre. This year a 1,300 acre field has yielded 74,000 bushels, an average of practically 57 bushels to the acre, the world's largest yield per acre from such an extensive acreage.

Mr. Noble's record yield in 1915 was Marquis, the famous red spring wheat, which originated in Ottawa, Canada, in 1903. This year a 1,300 acre field has yielded 74,000 bushels, an average of practically 57 bushels to the acre, the world's largest yield per acre from such an extensive acreage.

In southern Alberta, although most of the wheat planted in the spring, the growing of winter wheat is becoming more popular and Mr. Noble's record-breaking crop will have a further effect in that direction. On account of the warm Chinook winds, Alberta winters are remarkably mild.

Live stock spend the whole year out of doors, and either winter or spring wheat may be grown, as the farmer prefers.

Latest Wireless Story

Nationality Of Foreigners Established

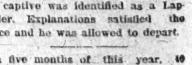

By Use Of Microphone

The latest wireless story concerns a foreign vagrant apprehended by the New York police and interrogated regarding his credentials. But he spoke an exceedingly strange tongue.

The police interpreters were nonplussed, and eventually several professors of modern languages admitted themselves beaten.

At this juncture an idea occurred that broadcasting might be of service. Listeners to the nearest broadcasting station were accordingly acquainted with the circumstances, and the luckless vagrant was identified as a Laplander. Explanations satisfied the police and he was allowed to depart.

In five months of this year, 10,000 branches of Canadian banks were opened and 21 closed.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER X.—Continued.

"And now, girls, for a lovely surprise! There is a beautiful lady in the city who is going to have a tea in her own home for us. She thinks of us, living away up here on the hill, and wants to make us happy. So next Tuesday afternoon she will open her lovely home, and kind ladies will come and bring gifts and money, all for us. Shouldn't we be very happy over it, and very grateful?"

"Good girls! Well go." It was Ross Lamb who spoke for the company, gathering up the feeling of the meeting in a brief exclamation.

"Oh, Ross!" said Wymuth's mouth almost quivered—"How could we be invited—all of us? I mean, you should not speak so!"

"Ain't she got room?" Ross persisted; "there's only twenty-nine of us."

"Go upstairs at once, Rose," Mrs. Wymuth commanded.

Rose started towards the hall, but stopped at the door to explain her position. "It's a swell way to hold a tea for us and not ask us!"

Miss Lamb's periodic excursions into the world of action made her a sort of social director for the girls. At once every girl felt she had been slighted.

"Rose! At once!"

Rose sauntered leisurely up the stairs. Relieved of her disconcerting

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be able to walk if I did not have it. I had a female trouble so badly I could hardly walk and when I got up and out I could hardly get around to do my housework. I had to sit at home for three or four days at a time. I was told to go to a friend's house and she had my Vegetable Compound and by the time I took two bottles I was beginning to feel better again. I took it every day and when I got up again and doing my own work, I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Vegetable Compound and think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be in better health. It would be without it if cost much more."

Mrs. NELLIE JAMESON, 805 East Cameron Street, Hamilton, Ontario.—"I am a woman who is nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at any time. It always makes me feel comfortable and consistently, will relieve that condition. G

your Vegetable Compound, I did, and by the time I took two bottles I was beginning to feel better again. I took it every day and when I got up again and doing my own work, I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Vegetable Compound and think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be in better health. It would be without it if cost much more."

Mrs. NELLIE JAMESON, 805 East Cameron Street, Hamilton, Ontario.—

"I am so glad you are interested in the Home," she said to her hostess, "it is high time someone became interested. I think it is a wicked place

presence. Mrs. Wymuth resumed: "And, as is usual in these cases where there are held in aid of a Home, there will be a lovely basket sent to the next day and the goodies it contains will be given to the girls who have the most honor marks."

"The tea was held. The morning paper featured it. Wednesday claimed Mrs. St. John for one of its most charming hostesses at a highly popular tea in one of the Girls' Friendly Home." The paper was right. She was a charming hostess, and the appointments were perfect. The oak door had a card on the outside which said "Please walk in." On a mahogany table reposed a sweet grass basket, tied with crimson ribbon, to receive the donations. The tadies came in gaily colored frocks, high-heeled, silk-lined, perfumed. Mrs. St. John, who stood inside the drawing room, received her guests. In an American Beauty cut velvet dress. The roses on the table in a bowl sitting on a mirror and so doubling their number, were of the same shade. The table was garnished with smax and the color scheme was carried out throughout."

Ladies came in swarms from the drawing room to be served in the dining room, and exclaimed prettily over the table. Very slim young ladies served, scantly clad in dresses which were low in the neck, high in the hem, and niggardly in width. There were studded olives, roller sandwiches tied with baby ribbon, tiny biscuits, filled sandwiches, the honest article of bread and butter that we have known and loved—blanched almonds, more sandwiches, plumcot filled, in harmony with the color scheme."

There was the feast! No one sat the feast—there was no time to eat, they were moulded. Pink roses they were set in the pale green leaves. The guests were ratiuous. Angel cake, white and of fairy lightness, and then white creams in disks, flavored with peppermint, rose disks, flavored with wintergreen, more almonds, more dieting. Really, I shouldn't—I am dieting—these are so delicious! I don't believe it makes one bit of difference."

Then good-bye to the charming hostesses, who was still at the entrance to the drawing room, and away.

You see, the paper was right—it was a "perfectly appetized tea." There would not have been one jangling note in its perfect harmony if Miss de Forrest had not come. She had read of it in the paper and decided to come, and it so happened that she came at five o'clock, when the rooms were crowded. Miss de Forrest was a large woman, deep chested, deep voiced, domineering. When she spoke, her voice boomed.

"I am so glad you are interested in the Home," she said to her hostess, "it is high time someone became interested. I think it is a wicked place

innocent girls and guilty ones

Miss de Forrest's voice carried over the rising and falling chatter—hushing it at last as the women became conscious that someone was speaking.

"Now, take the case of that young Finnish girl, Helmi—Some of you know her. She is an innocent girl, clear-eyed, truthful, lovely. Do you know the case? She is hiding someone and will not tell who sent her for the heroin. Rather a noble thing too, in this dull, selfish age. But she's hounded to death by the matron to make her tell. It's just a question of how long she can hold out. Now, think of that lovely girl sleeping in the same room and eating at the same table with some of the worst girls in town. And when she gets out it will always follow her that she had been in the Girls' Friendly. I went to the matron and asked her if there was any room for her. She said, 'Yes, we have a room for her. She is a good girl.' I know she's hounded to death by the matron to make her tell. It's just a question of how long she can hold out. Now, think of that lovely girl sleeping in the same room and eating at the same table with some of the worst girls in town. And when she gets out it will always follow her that she had been in the Girls' Friendly. I went to the matron and asked her if there was any room for her. She said, 'Yes, we have a room for her. She is a good girl.'

Women gathered around Miss de Forrest, "Miss Abbie, in her excitement, left her post at the table. "I know Helmi is a good girl," she exclaimed, "even if she did burn the stovetop that I left simmering on the stove."

Ev St. John spent a troubled night. She hated Miss de Forrest, great hulking thing, with a voice like a fog horn—what right had she, when everything was going so beautifully, to burst in like that and spoil everything? What good did it do a person, anyway, to try and do right? "Now, here I am," she thought, "more upset than ever, and if that big raw-boned valentine had only stayed away it would not have been all right." Out of her mind, the thoughts of Helmi she must see Helmi.

"We are gaining a foothold, Edgar,"

Mrs. Wymuth told her husband that night.

"People are beginning to realize

that the Home is being placed on a new footing. Mrs. St. John is greatly interested in the work here, and asked so kindly about our methods. She pleaded for that dreadful Flan girl, and urged me to be patient with her. She seemed quite distressed when I told her that she had actually struck you. Perhaps we had better not keep her away from her lessons. Mrs. St. John asked if she might not take her out driving some day, and I wouldn't like her to know, to think, I shall reinstate her in her classes. Mrs. St. John spoke so very kindly of her. She said she would try again to bring her back to the Club, and since then she has been laying eleven and twelve full-size eggs a week.

A Tip For Poultrymen

Englishman Says Sunstruck Hen Lays More Eggs

The latest method of keeping hens to lay an additional dozen eggs a week is to expose them to the sun.

E. Parker of Marham, Essex, England, has a hen which was affected by sunstroke when about a month old. Since it has grown up it has been laying two eggs at a time an average of four days a week, and on two occasions has laid three. Recently the other hen on the roost resented this infringement of uniform rules and began attacking the hen. Mr. Parker separated the hen from the other hens, and since then she has been laying eleven and twelve full-size eggs a week.

NAVY LEAGUE OF CANADA,
ALBERTA DIVISION

The Rev. Fred Cooke, representative of the Navy League of Canada, Alberta division, who has been in Blairmore taking up subscriptions to the Sailor Magazine and donations for the Navy League, wishes to thank the citizens for their assistance, as they have contributed about \$75.00 for the Alberta division.

The Navy League of Canada assists the widows and orphans of our men of the merchant service, as they do not receive government assistance. The Navy League supports sailors' homes and institutions, etc., in all our larger Canadian ports from coast to coast and looks after the welfare of our seamen when ashore. The Navy League also trains boys and young men and makes better Canadian citizens of them.

The Alberta division is required to raise \$8000 as its quota to the \$250,000 budget of the Navy League and hopes to raise this amount as quickly as possible, with the combined assistance of our people throughout the province of Alberta.

The Navy League of Canada in 1926 directed some 800 boys and young men into our merchant marine

and its work is almost entirely in its interests.

Let all show themselves good citizens in helping the Navy League in its most worthy cause and so be loyal to Canada and the Empire.

The Sailor Magazine is published monthly, at \$2.00 per year, and it ought to be in every Canadian home, in every Canadian organization and institution. Subscriptions to the Sailor Magazine and renewals as well as donations to the Navy League can be sent to John A. Irvine, Esq., honorary secretary-treasurer, or Rev. Fred Cooke, organizing secretary, 8117, First Street East, Calgary, Alberta.

COMMUNICATION

Garbutt Business College,
Calgary, Alberta,
October 21, 1927.

The Blairmore Enterprise,
Blairmore, Alberta.

Dear Sirs—You will be very much interested in learning of the success won by Miss Mary Sartoris, daughter of Mr. and Mrs. Mark Sartoris, of Blairmore. Mary is the only person who has ever gone from Alberta to take part in a world's typewriting contest. The contest was held in New York on Monday evening last and

resulted in Mary reaching seventh place in the World's Novice Typewriting Championship. Her rate of speed was seventy-five words a minute and she was only a few behind the winner whose rate was eighty-one words. Altogether, there were fifty-six entries—most of them champions in their own states and provinces.

I am quite sure all the residents of Blairmore will very highly appreciate the honor which has been brought to your town by the achievement of one of its young citizens.

Just a short time before the contest took place Mary found that she had to have her tonsils removed as they were poisoning her system and paralyzing her arm muscles. There was scarcely time for her to completely recover from this operation before taking part in the contest, otherwise she, no doubt, would have done still better.

* Permit me to rejoice with all the people of Blairmore in the success of one of its young residents.

Very sincerely yours,
F. G. GARBUZZ,
Principal.

In the local option vote taken at Cayley on Wednesday of last week, the drys won by 64 to 27.

THE SOLID GROWTH OF
LOCAL WEEKLY NEWSPAPERS

Charles Clark, of the High River Times, one of the most successful and experienced publishers of the provincial weeklies, has the following interesting article upon the local newspaper:

"In spite of the fact that the metropolitan press now reaches into nearly every town and village in the country, the local newspaper in Canada is each year getting on a firmer foundation and becoming more and more useful to its home community. It may be said that the day of the metropolitan newspaper is at hand. This is true, but it is equally as true that the day of the local newspaper is here too. The metropolitan daily with its world-wide news, its comic sheets and its magazine supplements, while of course essential in our modern civilization, cannot take the place of the home newspaper. The very fact that the big city daily must cover a broad field forbids its becoming local in any sense, and it is in the local field where the home newspaper dominates and finds its true usefulness. For, after all, it is the home news which is most important to us. We have the greatest interest in the community in which we live and in the people who are our neighbors and friends. And it is the local newspaper which records the happenings of the folks at home, and in addition fosters the civic pride and progressive spirit of the community. We frequently hear it said that the old time independent spirit of the newspaper is gone, that its editorial policy is now subservient to the business office. Yet this is not true. There is more unselfish idealism in the average local newspaper than in any other business enterprise. It frequently speaks out in the way which it believes will be for the good of the nation and of the community, regardless of what the consequences may be from a business standpoint. This is more than the average business man will do or can do. Of course, the local newspaper is now on a firm business basis. This is why it is improving from year to year, why it is giving its readers a constantly better newspaper, and why it is increasing its influence for good in the community, and it does its boosting often without any hope of material reward."

ONTARIO PREMIER SUGGESTS
SUBSIDIZING COAL SHIPMENTS

Strong support in Alberta's move to place coal from this province on the Ontario market was promised by Hon. Howard Ferguson, premier of Ontario, at a banquet tendered him by the Alberta government and the Edmonton Board of Trade, in Edmonton on Saturday last.

Premier Ferguson, who was welcomed by Hon. George Hoadley, urged the granting of a subsidy by the Dominion government to overcome the difficulty of high transportation charges on coal to encourage inter-provincial trade, and suggested the same procedure in moving grain, beef, fish and other western products to the markets of eastern Canada.

Fernie Elks have taken a three-year lease on the Ingram hall, which will be converted into an Elks' recreation home. The hall is equipped with gymnasium, sauna baths, and will have ample provision for reading and lodge rooms. The "Bills" expect to spend from \$1500 to \$2000 in extra furnishings.

TWO NEW FORDS ARRIVE AT
WISCONSIN TOWN; ARE VIEWED
WITH SATISFACTION

(Prairie du Chien Courier)
Considerable interest was aroused here by the arrival of two new Fords. While not ready for exhibition purposes, the Fords have been observed by several and much approval of their fitness and finish has been voiced. Their bodies are finely lined and graced with pleasing curves. Their color job is of a quality that shows richness and well-being, and their lines in general are wholly fitting for the work desired of them. Probably not without reason the design follows that of former models, but there are individual differences.

They are generally quiet, but there is considerable sound when under heavy stress of exertion.

Their speed and durability have not been tested, but their fuel consumption at least at the present time is equal to that of families obtained relief.

surprisingly low. METHODS OF
CARING FOR THE RADIATOR OVER
FIREFLOW REMAIN THE SAME.
While formed on the same general principles, there is much difference which is not surprising when it is considered that one is a boy and the other is a girl, born to Mr. and Mrs. Louis Ford. The babies have not yet been named, but they and their mother are reported to be doing well.

The new Pythian temple at Fernie was officially opened and dedicated on Saturday last by Supreme Chancellor Witte, of Milwaukee, and Supreme Keeper of Records and Seals Love, of Minneapolis.

The total amount paid in relief by the Independent Order of Oddfellows throughout the world from 1880 to the end of 1926 reached \$247,468,268. In the same period, no less than 61,697,674 members and 443,726 widows at least at the present time is owed families obtained relief.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VII.—Continued.

The magistrate proceeded to give sentence. "Stand up," he commanded again.

Heini stood.

"You see—she understands—I thought she did."

Addressing Heini he said, "You could have cleared yourself perhaps of one charge, but not of the other. So I have no option but to send you to jail. You shall be confined for three months at Stoney Mountain."

"Miss Rodgers was on her feet to appeal the case," she said.

The court room began to empty, only the regulars held their seats.

The transients were going. Some of the women would go back to attack the dishes they left in the sink; others went to inspect the shop windows, two of them strolled leisurely down to the White Punch to have a cup of coffee and a piece of pie. It was near lunch time, and as Mrs. Morris remarked to her friend Mrs. Edgar, "When a woman has only herself to cook for, she never cares when she eats."

They discussed the case as they sat at the round topped table.

"That girl was terrible," said Mrs. Morris, "but foolish. I'll bet she's shielding a man."

"I don't know," remarked her friend; "I remember when I was her age I had an awful crush on a woman about ten years older than I was. I forgot her name now, but she was my goddess for the time. There was something fine in that girl's face—something noble. It seems a pity to send her to jail, where she'll have to see and hear everything that's vile and ugly. The whole thing is rotten."

"Well," said the other one, "why don't we try to do something?"

"What's the use?" Mrs. Edgar was breaking her pie with her fork. "Women never hold together. That's why people like Magistrate Winsor can make the women's organization get away with it. The women's clubs are trying to make things better, but they get blamed for what goes wrong. You and I do nothing, and therefore are never blamed for anything. Great system!"

"Well, some of the women in the clubs are hungry," said Mrs. Morris. "I saw one of them the other day getting her money out of a pocket in her reticule. She's one of their big spenders, too. Why don't they keep up with the times, visit beauty parlors and learn the use of cosmetics?"

The other woman considered a moment. "SHH! There's nothing criminal in keeping money in the pocket of your political," she said, "when you come to think of it. She was lucky

to have money anywhere. And the Board disapproved her. I saw one of our foremost citizens trying to unlock the door of her suite with a buttonhook last night. But so long as we are not doing anything to make things better we should not be critical."

"You won't forget this afternoon? Don't be late—I am just having four blues."

CHAPTER VIII.

The Girls' Friendly Home stands on a hill overlooking the city, a great bare, white building with glistening windows, which in the rays of the setting sun burn like the bush at Moses saw, yet like the bush are not consumed.

It is to be ever looking down with its many eyes on the struggling people below, watching them with kindly glances, ever beckoning to those who are sore hearted in the struggle to come up and find safety.

Indeed, some such conception was in the minds of those who built it, and in the dedication services many an eloquent speaker told of the soothsaying city with its pitfalls and temptations, and rejoiced that here on this hill-top the people of God had made an island of safety where the young things caught in life's cruel triangle could find sanctuary.

There were numerous references in the dedication speeches to the lost lambs of the flock, pierced by many a thorn; the white lily bruised and broken and crushed in the dust of life, the last piece of silver which could buy a homestead, unless the speeches were made by the ministers of the city, who a large proportion made up the Board; the other members being of that type of middle-aged bony gentlemen who are usually alluded to as "solid business men."

The Board had its troubles, and sometimes even contemplated adding even its numbers. Some of the members made that suggestion emphatically of the excellent help they received from Ladies' Aid and other societies in their churches. As a rule the solid business men opposed the proposal.

It was felt that the presence of ladies might prove embarrassing. There were certain matters which were best discussed by men alone—besides, there was always a danger of women being too emotional. There was an Auxiliary Board, composed entirely of women, who held tea parties, tea suppers, made towels and sheets, looked after the girls' clothing, solicited donations and in general did all those little unimportant, yet useful, things which women do so well.

It was felt by the majority of the Board that the women had their part, and it would be better, not to confuse the issue.

The first difficulty the Board experienced was with a Matron—rather, a young person who was for such an important position, squarely, fort, who had come highly recommended from one of the Western States. She had many relatives in the city, and it was felt that her appointment might interest some of the solid business men in the home, for their relatives were of that type.

She began by making some sort of a merit system in the Home, which was rather alarming. She unlocked the doors; insisted that the girls lay aside the mid-colored uniforms which the Board had decreed should be worn, and actually took the girls out with her in turn to the movies and to concerts and lectures. She also had her friends come with their cars every week to take the girls for drives. She planned picnics, excursions, and indeed made such a happy place that not one of the girls attempted to escape, although they had every opportunity to do so.

The Board looked on calmly disapproving, yet helpless. But the matter came to a crisis at a meeting where the Matron was present by request. One of the members found one of the most solid, top, began by pointing out that there should be some differences in the way well-behaved girls and fallen girls are treated. Here the

Matron interrupted to ask him to repeat the word "fallen;" she gave the Board members positive chilly by the time she had said it about the lowest standard of morality which was made by men to shield men, and went on to tell them that many of the girls were innocent young things from the country who had come to work in the city to help the family at home, and had fallen victims to men's lust and hypocrisy. The very men who led them astray, fathers of families some of them, and regarded as respectable men in society, no doubt now spoke of these girls as "fallen women."

It was most embarrassing. She hinted that there should be women on the Board, and questioned the ability of men to quite understand the problems of rescue work.

Anyone can see from this what sort of woman the Matron was and why the Board disapproved her. The girls had loved her and had done their best to carry out all of her wishes. They had scrubbed and washed and polished the Home until it sparkled; they had planted a garden and made flower beds; they had sewed and crocheted and embroidered; they had sung, prayed, and bravely tried to live a useful happy life. The day she left the scenes were disgraceful—not a girl ate a mouthful; they just sat and cried. The Board could see that she had done well to get rid of her, but in getting such a whereabouts effect on the girls.

The Board decided that and there to have a man for the head instead by a woman of course. "There must needs be a woman," said the good old Dr. Smythe, "for appearance sake at least." So, after diligent care, Mr. and Mrs. Wymouth were found somewhere in the East where they were doing evangelistic work. Their letters of recommendation abounded in such terms as "earnest co-operation," "moral worthiness," "deep sincerity," "unfailing devotion," "passion for souls," etc. The Board was pleased with their joint and several appearance.

(To Be Continued.)

Socialists Opposed To Capital Punishment

Bill To Be Introduced When French Parliament Convenes

Agitation in France in favor of Saaco and Vanzeili has provoked a campaign in certain liberal sections of the press in favor of the abolition of the death penalty as advocated by Pierre Renault, Socialist leader and member of the Chamber of Deputies, who has announced that as soon as Parliament convenes for the Fall session he will introduce a bill to eliminate the guillotine and all other forms of capital punishment.

A sentence would be substituted for the death penalty. Discussing the projected measure, M. Renault said:

"The Saaco-Vanzeili case, although it had no connection whatever with France, demonstrated once more the horror which the death penalty provokes among civilized peoples, especially when justice seems in question and when the partiality of judges appears to supersede the absolute facts."

"Our own nation for twenty years has been faced with the possibility of an innocent man having been put to death. Civilized nations have no right to run such a terrible risk. We Socialists therefore demand that Parliament abolish the death penalty."

Teaches Glass Blowing

The University of Pennsylvania is the only large school in the United States which offers a course in glass blowing. The Professor is Frederick Wagner, one of the few glass blowers left in Pittsburgh. He has four students.

The discovery that the fiber of the cocoon spun by the silkworm could be made into cloth is ascribed to Se-Ling-She, a Chinese queen who lived about forty seven centuries ago.

Some medicine is as disagreeable that one can't even forget to take it.

Some men's natural bent seems to be patterned after a corkscrew.

A good man isn't necessarily a disagreeable neighbor.

Employment Agency Manager—So you'd like to employ a maid: What kind do you want?

Free Masons I've heard so much about.

The fire brigade of a European village dashed into the village last night and the chief fireman said:

"Beer and sandwiches all around, please, and hush up the order. We ain't got any too much time. We're on our way to a big fire."

Tablets found in ancient Babylon and Assyria show that banishing transgressions were carried on 5,000 years ago. Cheques and notes were made of clay, which were then baked.

Drives away pain—Minard's Liniment.

Experiments of more than thirty years have proven that Aluminum is the best container for tea. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition.

Lates Idea In Novelty Revue

A Novel Idea Is Puy Across At The Calgary Exhibition

American producers of theatrical revues looking for new ideas for fairs and exhibitions may profit by an original novelty recently offered at the Calgary Exhibition and Stampede.

The feature of the evening program is a "Grand Novelty Revue." Instead they saw some of the aristocrats of the live stock world of Western Canada. Then followed a series of scenes illustrating the progress of agriculture in the Canadian West from the time of the passing of the herds of buffalo down to the present time. The pure bred stock that took part in the revue seemed to be conscious that they were expected to "do their stuff" well and they did it. The revue was staged with elaborate scenic and lighting effects and was a popular success from the start. During the week the exhibition was attended by a capacity audiences and throughout the week a record attendance was registered at the "Dressing room" of the principal actors and actresses. The review showed that the fame of Western Canada does not rest only on the fact that it is one of the world's principal wheat producing areas, but is an important producer of every kind of live stock.

Col. Cook, for example, will try to find Alfred Merten, of Gotha, Saxony. For in the small wooden box is an infantry cap and a shoulder strap which were taken from Merten by the French at Blaiches in Artois, July 9, 1916. Col. Cook wants to restore the cap and return it to Merten's version of the war.

Another idea Col. Cook wants to give back is a wounded soldier, a stamped medal, dislodged in silver, which was taken from Wladislaus Jagla of the Fifth Company, 463rd Prussian Infantry, for being wounded four times at the front. Jagla was captured on September 30, 1918, at Monting.

Will Return War Relics

U.S. Colonel Has Large Collection Of German and Austrian Souvenirs

A man of 52, whose different manner and youthful face belie his age and his attainments, sailed from New York recently, en route to Hamburg, Germany. With him is a small wooden box and a large packing case.

The man is Col. George Clegg, 87, of 100, U.S. U.S.A. He is a collector of

Mothers, Your Health Must Be Up to Par

—Evans Studio

London, Ont.—"During one of my expectant months I was sick and very weak. I felt heavy all the time and suffered with sick stomach. I was advised to take Dr. Pierce's favorite Prescription, and after a few months I was able to get rid of it. It relieved me of all the bad effects, made me well and strong, my nerves were good, and I kept so well I could do all my own work and I had a fine time."

"I also find that Dr. Pierce's Pleasant Pellets keep the stomach lively and never give distress." Mrs. James Campbell, 109 Inferno St. (picture above). All agree.

Send to Dr. Pierce's Laboratory in Bruderheim. Out if you desire a trial of Dr. Pierce's Pleasant Pellets.

Betty: Have you a green lipstick? Shop assistant: Green lipstick? Betty: Yes, a railway guard is taking me out tonight.

THE TONIC THAT GIVES STRENGTH

After Acute Diseases the Blood Must Be Built Up Before Recovery Is Complete

Fever and other acute diseases like pneumonia and influenza, leave the patient weak with thin blood and weak bones. The period of convalescence is often long and tries and years of poor health have frequently followed so brief an illness as acute appendicitis.

One looks upon the bright side. It is sure to be the right side. At least that's how I've found it during my journeys through this land. And the queer hows shadows vanish. And how easy it is to banish. From a bright side sort of nature every doubtful thing.

—Mary D. Brine.

They are found in the world who have the gift of making joy every where and leaving it behind them when they go. Their influence is an inevitable gladdening of the heart. They give light without meaning to shine. Their bright hearts have a great work to do for God.

—Frederick W. Fisher.

The habit of looking at the best side of any event is worth far more than a thousand pounds a year.

—Samuel Johnson.

Corns are painful growths. Holley's Corn Remover will remove them.

—Audie.

"Do you ever play with little little boys, Whille?"

Whille: "Yes, Audie."

Audie: "I'm surprised. Why don't you play with good little boys?"

Whille: "Their mothers won't let me."

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, white fully effective, is mild.

If, after years of toll, a man wins success some day is sure to come along and tell him, how much he has won in half the time.

Minard's Liniment relieves backache.

"It's never too late to say 'dye,'" said the red-headed girl.

"Yes, it is," said the bald-headed man.

Men sometimes become wiser as they grow older, but they seldom become less foolish.

The value of these pills in conditions described above is shown by the statement of Mrs. Rebecca O'Brien, Pembroke, Ont., who says: "In November I started to get the bends, and at the time but little hope was held out for my recovery. However, with the best of care I was able to live about a month longer. By the time I did not recover my strength. The doctor told me I was anemic. My appetite was poor, I grew nervous and irritable, and practically gave up hope of ever being strong again. However, remembering that in my girlhood I had taken Dr. Williams' Pink Pills with decided success, I began to take them again. By the time I had used two boxes there was no doubt the pills were helping me. Continuing their use I soon got rid of the bends and my household duties. I continued taking the pills, however, if I had used twelve boxes, by which time I was enjoying better health than at any time in the past ten years. In gratitude for what the pills have done for me, I give this statement in the hope that it may point the way to health to some other person who is suffering."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

INCREASING THE VALUE OF CANADA'S FUR RESOURCES

There are thousands of trappers in Canada and all of them are engaged at one time or another during the winter season in taking the pelts of wild fur-bearers. There is hardly a farm, village or a town in Canada that has not got its trapper or fur trader. Millions of dollars are distributed each year among these persons as a result of the disposal of Canada's annual raw fur catch. Last year it had a value of \$15,072,244. A very considerable increase in the yearly value would be made possible were proper methods of pelt handling more widely known.

Too many trappers think that once they have taken a skin nothing else remains to be done. Amateur and farmer trappers, which form more than half of the trapping fraternity, are the chief losers through this lack of knowledge in the handling of raw pelts, as poorly prepared pelts bring much lower prices than those which have been properly prepared. Leading fur authorities have stressed the fact that in many cases up to one half of the pelts coming to the raw fur markets fall into the unprofitable class and that every year there is a tremendous loss in pelt values that could be prevented. The loss, however, is not confined to the careless trappers, but affects the whole fur industry and lowers the value of both the raw and finished product.

With a view to improving this condition and making possible a wider knowledge of the essentials necessary to the proper skinning, stretching and drying of raw pelts, a monograph entitled "The Preparation of Pelts for the Market" has been prepared by the department of the interior. This monograph will be sent free of charge on request to the Director, Natural Resources Intelligence Service, Department of the Interior, Ottawa, Canada.

A grand Armistice ball will be held in the Blairmore opera house on the night of Friday, November the 11th, under the auspices of the Imperial Order Daughter of The Empire and the Canadian Legion, B.E.S.L. Mrs. Altermatt's seven-piece orchestra will furnish music.

Mulligan was passing down the street when he met a brass band playing "The Wearin' of the Green."

"Three cheers for old Ireland, yelled Mulligan."

"Three cheers for hell," responded the bandmaster, who was hot and tired.

"That's right," said Mulligan, good-humoredly. "Every man for his own country!"

A school marm in Cape Town was teaching her pupils to sing "Go Bless the Prince of Wales."

"Was this song used in America first?" one of the children asked.

"Certainly not. Whatever made you think that?"

"Because," was the reply, "it says 'Let the prairie echo God Bless the Prince of Wales.'"

Only then did the teacher discover that the whole class was singing it that way, instead of "Let the prayer re-echo."

A Woman's Logic

Mrs. Jones cast an entirely new light—and it may be a wholly reasonable one—on the problem of woman's dress the other night. She and Mr. Jones were awaiting callers, and Mr. Jones surveyed her new gown rather critically. "Isn't it a little extreme?" he suggested. "A little short and low cut?"

"Well, I don't know," said Mrs. Jones. "They are coming to see me, aren't they—not the dress?"

"Saxpence?" said Sandy to an Edinburgh chemist, who had charged him that for a packet of sulphur. "Why, mon, I get it for fourpence in Glasgow."

"Aye," said the chemist, "an' for a' I care ye can gang awa' tae another place where ye can get as much sulphur as ye want for naething."

Transportation Epic of North America

(1) "Canadian Pacific" type locomotive represented the Canadian Pacific at Baltimore. (2) "Hold-a-Tom Thumb," built in 1830, the first locomotive in North America. (3) Peter Cooper's "Tom Thumb," the first locomotive built in America. (4) The "Atlantic" of 1832 vintage.

The epic of transportation in America from the days when Indians trekked across the plains with their luggage on poles dragged by an animal to the days when 260-ton locomotives thundering across the country hauling hotel cars at 70 miles an hour was enacted at the recent opening of the Fair and Exhibition and Pageant of the Baltimore and Ohio Railroad this fall.

Canadian interest at the "Fair of the Iron Horse" was keen as this country was represented in Baltimore by the latest achievements in the way of locomotive construction. The Canadian Railroad was represented by its fine and unique 260-ton "Cooper" engine, the largest passenger locomotive, the latest type of their "2300" Pacific class locomotive number 2338, which drew the Prince of Wales. Prince George and Premier Baldwin during their recent trip across Canada. Engineer W. R. Creighton (who has been with the Canadian Railroad for 24 years) and Fireman R. F. Thomas (who had only piloted the Prince of Wales train, but took the locomotive from

to accept as something tangible but not the curios that have been prepared from time immemorial years back. Perhaps the most interesting old-time exhibit was Peter Cooper's "Tom Thumb," the first locomotive built in America. It was being constructed in 1832. The heads of the B. & O. railroad were so impressed with it and the evident value of steam power that they immediately laid and organized the road a century ago.

Real Indians added a romantic dash to the scene. They whooped past the locomotives on their fleet ponies and then returned to their tipis to sit down to view their encampment a short distance away.

One of the outstanding features of the Pageant was the driving of the roads who manned the old-time trains and the passengers who made the journey end to end around the tracks in front of the crowds. The exhibition was true to the period when the locomotive and train "represented and added sufficient color to make the exhibition one of the most picturesque and historical yet staged."

RED ROSE TEA "is good tea"

Now packed only in **Aluminum**.

Wild Life Of Western Canada

Not least among the attractions that Western Canada offers to many people, whether permanent resident, tourist or sportsman, is the abundance and variety of its wild life, and now that the hunting season is at hand it is opportune to make something more than a passing reference to the value of this great asset to all of our Western Provinces.

Judged from any and all standpoints the wild duck and geese, prairie chicken, partridge, and other game birds are of immense value to this country. They constitute a picturesque feature of life on the prairies and a constant source of delight to the lover of nature. What greater pleasure can be had than to witness the flight of duck in the early dawn or as the sun sinks to rest! A man must be of a very stalid nature indeed who does not get a thrill as he watches them winging their way across the sky.

To the hunter our game birds offer the best of opportunities for the display of the keenest marksmanship, coupled with the best sportsmanlike qualities. And, finally, they provide a welcome addition to our food supply—a delicacy appreciated by all.

Later in the season comes the opportunity for the big game hunter to match his craft and skill with the deer and moose, in a word, the wild life of the West is a drawing card for thousands of people. Without these game birds and animals the West would not be the West which attracts and holds.

But human nature being what it is, it became necessary for Governments by legal enactments to protect these methods of sport from himself. As a result, the open season for shooting has had to be limited, and the size of "bags" greatly restricted in order to save birds and animals from extermination. And it is only through the strict observance of these laws and a rigid compliance with all regulations, that a further curtailment of privileges now enjoyed can be avoided. Laws have been passed and regulations are enforced by Governments, not for the purpose of depriving hunters and citizens generally of the privilege of shooting, but in their own interest that it may be preserved and continued to them.

There are still some individuals in this world, who wrongly style themselves "sportsmen," who consider it sport and something to be proud of and boast about to shoot an inordinately large number of birds in a day or a season. These individuals revel in having their photographs taken, gun in hand, and with their "kill" displayed around them. The real sportsman, and the true citizen, looks upon all such exhibitions with regret and a loathing contempt. It is one thing to shoot for food, or for an hour or two of the real thrill that comes to the true hunter, but quite another to engage in a worse than needless orgy of wanton slaughter. The man who will kill and kill for the mere joy of killing and in order that he may boast of his "bag" is no sportsman. On the contrary, he is the enemy of all sportsmen, and in the final analysis his own enemy. In the language of the old table, he is destroying the goose that laid the golden eggs.

The writer of this article has no desire to preach; he is not a killjoy. But he would, even on the world's grounds of self-interest, not to mention many lofty motives, urge all the people of Western Canada to, constitute themselves unofficial game guardians, to fully and loyally observe the spirit and letter of the game laws themselves, and see to it that other people do likewise.

71-Year-Old Triplets

Abraham, Isaac and Jacob Waggoner, a seventy-one year old triplets, claim the distinction of being the oldest triplets in Tennessee and possibly in the United States. They have lived all their lives within ten miles of one another, have never been ill enough to require a doctor's services and do not smoke, chew or drink.

A French watchmaker has invented a watch that tells time without hands. A moving dial turns inside a stationary rim. The minutes appear on the dial and the hour is shown through an opening in the dial.

According to British research experts, London's smoke cloud excludes nearly two-thirds of the beneficial ultra-violet rays of sunlight from that city.

Dial numbers have been converted into raised numbers to enable blind persons to tune in different stations on the radio receiver.

CHILDREN CRY FOR

MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulence, Wind Colic and Diarrhea; allaying Fervishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitation, always look for the signature of **Robert Fletcher**. **Absolutely Harmless—No Opium.** Physicians everywhere recommend it.

North Best for Whites

Tropics Only Suitable for Colored Race Says Scientist

The white races must eventually turn toward the polar regions in search of new homes, Dr. R. N. R. Brown, president of the Geographical section, told the British Association for the Advancement of Science at a meeting in Leeds, England.

"There is no real evidence that the whites are suited for permanent residence in the tropics," Dr. Brown declared. "All evidence that is conclusive suggests that the colored races will eventually occupy the warm lands."

"Eventually the tide of white settlement will definitely set northward, even to the Arctic seas, and in its flood destroy the present inhabitants."

Removes Touchy Corns Brings Solid Comfort

Again like music—takes all the pain—makes aching corns feel better in a few seconds. That's how "Putman's Extract" acts. You will not be disappointed with "Putman's." It never fails to pull out or remove painful calloused feet. Get "Putman's Extract" from your druggist. Refuse a substitute.

Another Evolution Theory

British Zoologist Thinks Man-Developed From Jelly Fish

If you are musical, like dancing, or have artistic instincts, you may thank your jelly fish progenitors of ages ago, in the opinion of Dr. P. Biddler, British Zoologist. Dr. Biddler outlined his theory that man evolved from the lowly jelly fish in an address at Leeds, England, before the Union, according to advices to the Department of Commerce from W. H. Kelley, automotive trade commissioner to Europe.

A cold luncheon is served, including hors d'oeuvres, lobster, duck, veal, ham, salad, cheese, fruits and coffee, with wine, water or tea. In the near future an electric stove will be installed for preparing warm food.

The "plane" carries a pilot, a radio operator, cook, waiter and ten passengers and their baggage. It is one of the fastest in Europe, covering 335 miles in two hours.

Like a Grip at the Throat. For a disease that is most classified as fatal there is probably nothing which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and breathless, though the attack passes. It is left in a weeping dread of its return. Dr. J. D. Kellogg's "Asthma Remedy" is a wonderful remedy, a agent that immediately relaxes the restricted air passages so that thousands can testify that it is sold by dealers everywhere.

Proposes Scientific Holiday

Bishop of Ripon Would Drop Work For Ten Years

Feeling that man's progress in agriculture has been retarded in Britain circles by the lack of scientific knowledge, the Rev. Edward Arthur Bishop, Bishop of Ripon, for a ten-year scientific holiday.

Sir Daniel Hall, scientific advisor to the Board of Agriculture, is quoted as terming the proposition equivalent to asking the business man who finds difficulty in keeping up his end commercially to stay in bed for a certain length of time in order to save money and expense.

The Duchess of Atholl, president of the Education Session of the British Association for Advancement of Science, remarks: "We may be breathless and feel tired in the race to secure knowledge but we cannot sit down and do nothing for ten years."

Sir Oliver Lodge, said that if the Bishop's criticism referred only to the application of science he might agree with him. As an example, he mentioned television and aviation. Any stoppage in the advance of knowledge however would be a very serious thing.

Sir Oliver added that "although" we are now living in a great period of scientific advancement, rather than saintness and philosophy, the era of philosophy will dwindle again and I think we may take heart."

Used by physicians—Minard's Liniment.

A Professor of Psychology claims that brown eyes are an indication of a weak will. He might also add that black ones are an indication of a weak defense.—Judge.

It is estimated that \$300,000 worth of automobiles are stolen annually in the United States.

French Scientist Poorly Paid

Edouard Branly Has Worked Fifty Years Under Trying Conditions.

Edouard Branly is cited by newspapers as typifying the struggle of French scientists to work under miserable conditions. Branly is inventor of the "condenser." France calls him the "father of the wireless." Branly has as his only assistant in a ramshackle "laboratory" an aged woman who ekes out a living by doing extra hours of housework in other homes. This maid of all work is now the scientists' "laboratory chief." She was intelligent and the professor trained her in his work.

For fifty years Branly has worked under the most trying conditions, drawing a salary of about \$75 a month, professor and sonpoor of his family by occasional practicing as a physician.

These facts are told by French papers as illustrating the need to pay well men who give their lives to science.

The speediest bacterium can travel only about four inches in 15 minutes.

Minard's Liniment passes sore feet.

Operates Restaurant Plane

Added To Paris London Service By French Aviation Company

A restaurant "plane" has been placed in daily operation on the air line between Paris and London by a French aviation company, the Air Union, according to advices to the Department of Commerce from W. H. Kelley, automotive trade commissioner to Europe.

A cold luncheon is served, including hors d'oeuvres, lobster, duck, veal, ham, salad, cheese, fruits and coffee, with wine, water or tea. In the near future an electric stove will be installed for preparing warm food.

The "plane" carries a pilot, a radio operator, cook, waiter and ten passengers and their baggage. It is one of the fastest in Europe, covering 335 miles in two hours.

New developments have so greatly cheapened cable tolls that they can compete successfully with wireless.

Cable Business Not Affected by Wireless

Prophecy That Its Days Were Numbered Proved Rash

When, twenty-six years ago, Marconi first succeeded in sending wireless messages from Newfoundland to England, many people prophesied that the days of the submarine cable were numbered.

The rashness of this prophecy is proved by the fact that, during the first four months of this year, the value of the submarine telegraph and telephone cables sent out from the United Kingdom amounted to £315,763. Even this sum, though, is far below the average, owing to the fact that the trade has not yet recovered from the effects of the coal strike.

Although the early cables were slow, the invention of wireless telegraphy and telephony spurred the cable companies to fresh effort. The result was the discovery of a new alloy nickel and iron which, treated by a secret process, proved to have a conductive power thirty times greater than that of the best soft iron.

The new cable, named Permanent, and its efficiency is shown by the fact that it is possible to send more than two thousand letters a minute through the newest trans-Atlantic cable wound with permanent.

This compares with a speed of about three hundred letters a minute through other cables.

Developments have so greatly cheapened cable tolls that they can compete successfully with wireless.

Worships God Of Waterfall

Japanese Hermit Was Discovered

Near Honolulu By Engineers

A Japanese hermit, worshipping the god of a waterfall in Kahama stream, was discovered near Honolulu recently by engineers on a survey trip. They came upon a big cataract and found a man with a long beard standing in the middle of the falls, half way down a rocky mountain in a strange manner. He lived in a small tent hidden in the woods and comes to town to buy food. He always has sufficient money to make his purchases, but no one knows how and where he gets it. Kamakas (old timers) here say that there were formerly two hermits, but no one knows what became of the other.

CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

DE FOWLER'S EXTRACT OF WILD STRAWBERRY

Mrs. D. Lewis, Back Bay, N. B., was very ill with cholera and suffered severely from cramps and pains in the stomach. She tried several remedies, but nothing seemed to help. A friend of mine told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle and gave them a few drops. I was soon well again and I have not been without it in the summer months."

Don't Accept a Substitute.

This preparation has been on the market for 50 years past and is sold by The Minard Co., Limited, Toronto, Ont.

Driving became dangerous in the old days when the horse felt his oats! now it's when the driver feels his oats.

The oil of the people—Many oils have a cooling and antiseptic, but Dr. Edward Branly Extract Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterilizing qualities have brought it to the front in the field of medicine and it can truly be called the oil of the century. Thousands have benefited by it and would use no other preparation.

The Good Natured Scotch

The Scotch are all right. But the Scotchman is thick-skinned and he can take a joke, and therefore the jokes about him grow apace. Jokes about the Jews and the Irish have virtually been ruled out of our theaters because of organized protest. Not so with jokes about the Scotch. The Scotchman chuckles at the stories about his penuriousness. He laughs at their excellent golf stories which usually permit him only one ball in his bag. And, after all, it is better to laugh with the people who laugh you.

Flour Experts

During the first six months of 1927, 16,192,328 barrels of flour were manufactured in Canada, a little more than half of which was exported from the country. In the twelve months ended June 30th, Canada exported \$65,101,257. Exports to the United Kingdom increased from \$2,319,212 barrels worth \$21,693,802 in 1926 to \$2,562,765 barrels worth \$24,085,189 in 1927.

Borden's St. Charles Evaporated Milk

Would Sell Canada To The Canadians

Citizens Do Not Yet Realize Greatness Of Dominion

"Let us sell Canada to ourselves, first, then let us sell it to everybody else," urged Howard Stinchbury, Trade Commissioner of Alberta, who spoke in Toronto at the Alberta luncheon, given in the Women's Building, C.N.E., by the Ontario Department of Agriculture for representatives of the various provinces of the Dominion who were in charge of the exhibits in the Women's Institute wing.

"Adopt that as your slogan and in ten years we will have Canada occupying the place she should occupy," was Mr. Stinchbury's advice, as he pointed out the active part the Women's Institutes could play in such a drive. "It is a crime that we have to sacrifice our goods as 'produced-in-Canada' and it shows only too well that we are not ourselves sold to Canada.

A robin built a nest on a mop on the back porch of the home of a Chicago woman. She secured another mop and left the robin undisturbed until a family of six were reared.

The only thing in the four Gospels to which Hindus invariably take exception is the killing of the fatted calf. This is because they regard the cow as sacred.

Don't get in with people who are always falling out.

COWLEY HAPPENINGS

The hum of the threshing machines is heard here now from dawn till dark.

Mr. and Mrs. Niven, of Lethbridge, were recent guests of Mr. and Mrs. Archie Swart.

Mr. and Mrs. W. F. Blackburn, of Fishburn, were week end guests of Mr. and Mrs. M. A. Murphy.

Miss Alison Brockwell has returned to Calgary, where she will resume her commercial course of study.

Mrs. Harry Hatman, of Calgary, has returned, after paying a few days' visit here with Mrs. Doyle.

A whisky drive and dance will be held on Friday night under the auspices of the Women's Institute.

The gift of a box of peony roots from H.R.H. the Prince of Wales has arrived safely. As there is no public park here, they will, very likely, be set in the two church yards.

Mr. and Mrs. Diamond started for Montreal on Monday night's train, on an extended visit. Mr. Diamond has been ailing in health for several months past and we understand he is following the doctor's orders by going to a lower altitude.

The Women's Institute held their monthly meeting at the home of Mrs. Leigh on Tuesday. Although the attendance was very small, considerable business was transacted. Ten dollars was subscribed to help a sick woman. Caring for the trees in the church yards was a topic brought up for discussion.

TO SLAUGHTER 1000
HEAD OF BUFFALO

HEAD OF BUFFALO

In order to reduce the size of the buffalo herd at Wainwright, which of recent years has been increasing very rapidly, 1000 head of these animals will be slaughtered during the coming fall and winter.

The P. Burns Co., of Calgary, it is announced, has the contract for the killing and the meat will be sold as a commercial product, while the hides find a ready market.

In spite of the transfer of some 5000 head of buffalo to the park reserve in the north, the remainder of the herd is still too numerous for the carrying capacity of the park.

NOTICE

In the Matter of an Explosion which occurred on or about the 23rd Day of November, 1926, in a Coal Mine Operated by the McGillivray Creek Coal and Coke Company Limited, at Coleman, in the Province of Alberta.

The Lieutenant-Governor in Council, of the Province of Alberta, in pursuance of "The Public Interest Act" contained in the Revised Statutes of Alberta, 1922, has appointed The Honourable Horace Harvey, Chief Justice of Alberta, as a Commissioner to conduct and hear into the matter as far as possible, the cause of the said explosion, and to report thereon to the Lieutenant-Governor in Council.

The said Commissioner will proceed to hold the said inquiry at the Town Hall, in the Town of Coleman, Alberta, commencing on Tuesday the 15th day of November, 1927, at 10 o'clock in the forenoon.

The undersigned will be in attendance at Town Hall in the said Town of Coleman, each day from and including Thursday the 10th day of November, 1927, to the date of the said inquiry, and during the continuance of the hearing, and all persons having any knowledge or information, directly or indirectly, respecting the cause of the said explosion or the subject matter of the said inquiry, are requested to furnish them with any such information, and further to communicate with them the cause and nature of any persons or persons likely to have any such knowledge or information together with all other requisite particulars, and are further, invited to attend at such inquiry, and if necessary to give evidence thereto.

DATED at Edmonton, Alberta, this 24th day of October, A.D. 1927.

H. H. Parlee,
Council for the
Control of
the
27 Nov. 1927.

H. O. OSLUND.

BLAIRMORE UNITED CHURCH

Rev. J. W. Smith, Pastor

Serve the Church that the Church may serve you.

Services for Sunday, October 30th, the Pastor in charge—

MORNING SCHOOL at 11 o'clock.

Continuing the general subject of "Jesus Entering His Life Work" the subject for Sunday morning will be "The Man from the Desert." All young people especially invited.

AFTERNOON SCHOOL at 2. This school is steadily growing. Are your boys and girls there? It is the aim and purpose of these Church schools to help and further the work of the parents in training the boys and girls to become God-fearing men and women.

EVENING WORSHIP at 7.30. The

subject will be the "Hound of Hell." Just as surely as the "Hound of Heaven" follows us with "majestic insistence," so does the "Hound of Hell" dog our footsteps.

TUESDAY at 7.30. The Young People's Society will meet in the Church. Let us have a great lineup of all the young people in the congregation.

WEDNESDAY, Church Night at 7.30. The subject for study is "Divine Deliverance." "Lead us not into temptation, but deliver us from it."

At 8.30, Leadership Training Class. This class lasts about one hour. Everyone interested in training children are invited.

ANNOUNCEMENTS. The Board of Stewards will meet in the Manse on Monday night next, October 31st, at 7.30. All members please make an effort to be present.

The Ladies' Aid will hold their regular monthly meeting in the Church on Wednesday afternoon next, at 2.45. All members and those interested are asked to attend.

On Saturday, November 12th, a Religious Education Institute is being held in Blairmore United Church. Teachers, Group Leaders and Parents from Fishburn, Pincher Creek, Cowley, Bellevue, Hillcrest and Coleman will be present. The public of Blairmore are welcome to attend all the sessions, but especially are they invited to the evening meeting. The programme for the day is as follows:

Morning—10.00, Devotional period, Rev. J. W. Smith; 10.30, address: "An Ideal Sunday School," Rev. John L. Wright, "Bellevue"; 11.10, address: "Aims and Objects in Teaching," Mr. Donald McPherson, Blairmore; 11.50, address: "Teacher Training in the Local Church," Rev. F. E. Howley, James, Fishburn.

Afternoon—2.00, Devotional period, Rev. F. E. Howley James; 2.15, departmental discussions: (a) Children's and Junior Work Section, leader, Rev. John H. Garden, Pincher Creek; (b) Girls' Work Section, leader, Mrs. Stevenson, Pincher Creek; (c) Boys' Work Section, leader, Gordon Lapp, Calgary; 4.00, address: "The Unfolding Life," Rev. Henry J. Bevan, Coleman; 4.45, address: "Commitment to Christ and Church Membership," Rev. J. W. Smith.

Evening—7.30, Devotional period, Rev. Roy C. Taylor; 7.45, address: "The Adult Department of the Church School," Rev. Roy C. Taylor, Hillcrest; 8.15, address: "Home Religion," Rev. Robert W. Griffith, Cowley.

Benediction.

DONT FORGET the Ladies' Aid

Hallowe'en Tea and Sale of Home

Cooking, Candies, etc., on Saturday

afternoon next, October 29th, in the

Elks' Hall. Come yourself and bring

your friends.

—

A preacher in a Regina church is

said to have made a bad break last

Sunday. At the close of the anthem

he rose to preach, and tactlessly chose

the text: "Now when the noise had

ceased—" But the choir got their

own back. At the end of the long

prosy sermon they rose and spontaneously burst into the anthem: "And

when we awoke from our sleep."

PYTHIANS RECEIVE VISIT
FROM SUPREME HEADS

Members of the Knights of Pythias Lodges in this district were afforded the very exceptional opportunity last night of meeting with two of the supreme heads of the order, in the persons of Richard Witte, of Milwaukee, supreme chancellor, and Harry M. Love, of Minneapolis, supreme keeper of records and seals, at a mass meeting held in the Castle Hall at Coleman.

Upwards of one hundred members of Turtle Mountain Lodge, Hillcrest; Livingstone Lodge, Blairmore, and Sentinel Lodge, Coleman, were in attendance, being augmented by three from Fernie, one from Drumheller, five from Lethbridge and one from Medicine Hat.

Following the opening ceremony of Sentinel Lodge, the gavel was placed in the charge of Grand Chancellor Wm. Bannan, of Medicine Hat, who conducted the ceremony of initiation, while a class of fifteen candidates were initiated in the mysteries of the rank of Page.

The most interesting feature of the work was the displaying of the much prized Rathbone Bible, the property of the Supreme Lodge and which is continually in the custody of the supreme keeper of records and seals.

Bro. Love, acting as supreme prelate, dealt exhaustively with the history of this treasured book, which had been presented to the order by its founder, Mr. Justice Rathbone, on February the 19th, 1864, and upon which in the last three years no less than twenty-two thousand worthy candidates seeking to better themselves and humanity through a deep knowledge of Pythianism had received their obligation.

This class of fifteen candidates from the lodges of the Crows' Nest Pass had the rare opportunity of participating as part of that noble band of twenty-two thousand. Since the formation of the order in 1864, the membership has increased by alarming proportions, till today no less than 720,000 names are enrolled, while upwards of 300,000 others have joined the auxiliary ranks of the Pythian Sisters.

Following the degree work, the meeting was briefly addressed by the supreme chancellor, then adjourned, the gathering repairing to the refreshment hall, where large tables were bounteously laden with edibles, to which full justice was accorded.

The chair for the after programme was taken by Bro. William Bannan, grand chancellor of the grand domain of Alberta, who in his opening remarks reminded those present of the rare opportunity that was theirs on this occasion to hear one of the biggest men on earth in one of the ablest talks on fraternalism ever heard.

Those present, after hearing the supreme grand chancellor for a space of close on an hour, were unanimous in support of the chairman. From beginning to end the address was brimful of wit, humor and wise counsel, and there is no doubt whatever but that its influence will have the desired effect of increasing interest in the order in this district.

The musical end of the programme was contributed to by the following artists: William Smith, of London, England, pianoforte solo; Bro. Hill, in comic song; Bro. Phillips, solo; C. Reese, solo; W. Claryburn, Hillcrest, solo; Phillips and Reese in duet.

The meeting was addressed briefly by Bro. Harry M. Love, the supreme keeper of records and seals.

A very pleasing feature of the evening's programme was the presentation by the supreme chancellor to Hillcrest Lodge of a gavel, made of pure myrtle wood, the gift of the K.P. Lodge of North Bend, Oregon.

Towards the close three rousing cheers were accorded the esteemed guests and a hearty vote of thanks to the various artists who assisted in the programme and to the committee in charge of the refreshments.

Bro. J. C. Wainwright, grand keeper of records and seals, of Calgary, was in attendance.

Bro. Witte, Love, Bannan and

Wainwright left by this morning's

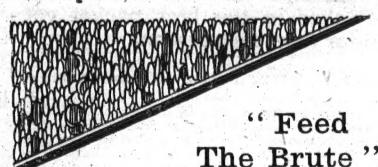

local for Calgary, where a big meeting is to be held tonight.

For the third time in three years the Sun Life Assurance Company of Canada has made a grant of \$30,000 to the Canadian Medical Association to pay the expenses of giving post-graduate work to the medical men of the Dominion, especially to those who are at distant places, and being alone, cannot well leave the district without a relieving doctor.

We understand that a class will be formed, under the auspices of the local school board and under the super-

vision of the provincial institute of technology and art, for those wishing information on economical operation and maintenance of cars. A limited number wanted for class. Names may be left at the Crows' Nest Pass Motors. Class will open on November 1st, with Mr. F. R. Keer, of the Crows' Nest Pass Motors, as instructor.

William Patterson, a great war veteran, has been appointed to the Fernie city police force, to take the place of J. Cameron, who resigned recently to accept the position of chief of police at Red Deer.

THE wise housewife soon learns the lesson. It is her duty to give him not only food that tastes good, but food that supplies him with health and energy.

MOTHER'S BREAD

does both. Its rich Bread flavor is a never failing appetite-delight. Its perfect balanced ingredients make it the ideal health-food. Every morsel is easily assimilated—not a crumb goes to waste.

The Conservative National Convention

The holding of a national convention by any great organization is always a matter of interest and of importance to people generally, because of the effect it may have on the country as a whole. But when such a convention is called by a political party for the purpose of formulating policies and selecting a leader, the gathering becomes one of first importance. It was natural, therefore, that the recent Conservative Convention in Winnipeg should command not only the interest of members and adherents of that particular party, but of the Canadian people as a whole.

Interest in the convention was all the greater because it was unique in the history of the party, being the first national gathering of Conservatives to be convened since Confederation. Liberals and other political groups have convened in national convention but the Conservatives had not done so prior to this year of Canada's Diamond Jubilee. It added one more nationally important observance of this memorable year in Canada's history.

As is well known to our readers, this column does not attempt to deal with or discuss questions which are the subject of controversy between political parties, and in this particular article there is no intention of departing from that rule. But as a national event, the recent convention presented certain features and took certain actions which, instead of being controversial, are matters for general satisfaction.

In the first place, like all great national gatherings, the Conservative convention performed an unquestioned service to Canada in bringing together hundreds of the leading men and women of the nine provinces. The resultant exchange of views and opinions, the new knowledge gained of each other and each other's problems, the round table conferences in committee, can not fail to prominently affect future policy throughout the Dominion.

To the West, particularly the Prairie Provinces, theudson Bay Railway project, the removal of a step and not to complete the railway but to develop a port and traffic in and out of that port is most gratifying. It definitely removes this great undertaking from the realm of partisan politics and places it where it belongs as one of the great national understandings of the Dominion to the success of which all are committed.

It is likewise gratifying to the West that the mantle of leadership should have fallen on the shoulders of a Western man, yet a man who has an intimate knowledge of the East. Whether one agrees with the political views of R. B. Bennett or not, few, if any, will question his ability or his love for and desire to serve his native land. His long experience in public life, as a member of the old North-West Territories Assembly, the Alberta Legislature, and the House of Commons, his training in law, his qualifications as a speaker, and the responsibilities which have been his as Minister of Justice and Minister of Finance in former Governments at Ottawa, should fit him for his new task of party leadership. In the hands of Hon. Mackenzie King and Hon. R. B. Bennett, all that is best in British Parliamentary traditions and procedure should be worthily upheld.

Finally, the convention, and the settlement of the question of leadership, should have the effect of giving greater stability to political thought throughout the Dominion. It marks the end of a period of indecision and uncertainty in the ranks of one of the political groups which is a good thing for Canada as well as for the party itself. Unity in purpose and decisiveness in action is what a young and rapidly developing country like Canada urgently requires in order to make progress. It is vital to the interests of the Dominion that not one or two but all political groups know their own minds, definitely state their policies, and show decisiveness in their actions. Unless those who direct and those who seek to direct the destinies of Canada are themselves strong and united in leadership and policy, it is futile to hope that they can make that contribution to the welfare and progress of Canada to which is essential.

New Serum Successful

Claim Cure For Infantile Paralysis Has Been Perfected

Discovery of what is said to be the first effective commercial specific for treatment of infantile paralysis was announced at Indianapolis by Eli Lilly & Co., pharmaceutical chemists.

After ten years' research an anti-streptococcal serum has been developed from the horse as in the case of diphtheria and scarlet fever serums.

The serum is being produced there in co-operation with Dr. Edward C. Rosenow, chief of experimental bacteriology of the Mayo Foundation, and already 10,000 units have been sent to poliomyelitis epidemic centres from coast to coast and even into Cuba.

First reports show it especially effective in Ohio and California.

Clinical observations show that best results are obtained if the serum is used as soon as the case has run its course, recovery without paralysis being reasonably certain in such cases. The serum has been found effective in treating paralysis.

already begun, and in reducing hand of bodies already paralyzed.

The same Lilly chemists who developed insulin for diabetes control worked on the new paralysis serum.

Germany Plans Air Train

Powerful Planes For Locomotives and Gliders For Passengers

Aeronautical engineers in Germany are working on plans of an "air train" as a possible means of travel in the future. The locomotive will be a powerful aeroplane and the "pullmans" a row of gliders coupled to the locomotive and to each other, as the cars of a train, only with considerably greater spacing between the units.

Passengers in each glider will be destined for some particular town, and as the airdrome of each town is approached the glider for that destination will be released from the end of the string and settle gracefully down with its special pilot and its passengers.

Banff Winter Carnival

The Winter Carnival at Banff is to be held from February 4th to 11th next year, according to L. C. Orr, president of the Banff Winter Sports Association. Preparations are under way that give promise that this carnival will eclipse all previous events of the kind.

Many mothers can testify to the virtue of Mother Gravels' Worm Extinquisher, a substance known from experience how useful it is.

London's tallest policeman recently committed suicide when retired because of ill health.

In France forty-tens of letters could not be delivered last year owing to carelessness in addressing.

Relieves Sore Throat—Minard's Liniment.

An Unusual Expedition

Men Will Study Sea Life 500 Feet Below Surface

Plans for an expedition that has as its destination 500 feet below the surface of the Pacific Ocean were revealed here by George M. Williamson, one of the Williamson Brothers who lined Jules Verne's "Twenty Thousand Leagues Under the Sea" thirteen years ago.

In the project announced by Mr. Williamson, three men will be lowered in a depth of 500 feet below the surface of the ocean in a steel ball-shaped chamber, from which heat-glass portholes they will study marine life.

A specially built schooner carrying the party of scientists who will perform the researches will sail from San Francisco within sixty days for the west coast of Mexico, where the first experiment is to be made, he said.

Use This Liquid To Peel Off Corns

An amazing remedy—act in a few seconds' up and down. Torn corns shrivel up and loosen. Another application or two and the corn drops out. Wonderful—your feet are now free. Putman's Corn Extractor works. You can buy Putman's Corn Extractor from many druggists. Get your bottle today. Refuse a substitute for Putman's.

Old Age Pensions For B.C.

The Pittance That Will Banish the Worst Spectre Of Poverty

The Vancouver Province is strongly in favor of old age pensions, which are now established in British Columbia. "It means, little as it is," it says, "all the mighty difference" which lies between the tragedy of age in want and the assurance of a Pittance which will at least banish the worst spectre of poverty. "It is not too much, but it is a very great and beneficial thing, this beginning of old age pensions in Canada, in the lives of some of those neighbors and fellow citizens of ours—who have fulfilled their three score years and ten, and have found score years and ten, and have found the battle a little hard in their latter days."

A SIMPLE TREATMENT FOR CHILDREN'S COLDS

Cold in the head is very common at this time of year, especially in the very young. The first sign of a cold is a desire to lie down and sleep. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Dr. G. T. Taber, the ideal means of doing this. Containing no narcotics or other harmful drugs they soothe the child's restlessness, relieve its suffering and shorten the cold.

Taber's Own Tablets are without equal for relieving indigestion, constipation, colic, etc. They check the urge to cough and relieve a sore throat; promote health-giving sleep and make the dreaded teething period easy. The Tablets are the one medicine that a mother can give her child to relieve her suffering, and they are guaranteed to be free from injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Combined Harvester-Thresher

The harvester-thresher has had a very definite place in the crop of 1927. In 1926 there were 180 machines in Western Canada, which can approximate 99,000 acres. During the present season 200 machines were distributed in this territory alone.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and impair the child's works. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to health. Worms are a common cause of intestinal disturbance and damage, of worm infection are removed, and satisfactory growth is assured.

Father—"Oh, do you wish to marry my daughter? Do you know she is used to all the luxuries of life?"

Poor Suitor—"Fine! And I can easily adapt myself."

"A Babe in the House is Well-spring of Pleasure."

St. Catharines, Ont.—"During motherhood I was all round, nervous and weak, when, upon advice, I began taking Dr. Fawcett's Fawcette's. It strengthened me, quieted my nerves and I had no trouble. I kept well and had a fine, big, healthy baby—he has been a wellspring of pleasure."

Francis Beach, The Enterprise was so helpful to me that I believe it is the only medicine for the colds I have had this winter."—Mrs. Gordon Bouch, 35 Wiley St.

Go to the drug store at once and obtain this Prescription in tablets or capsules, or send to Pier's Laboratories in Bridgeland, Ont., for a trial package of tablets.

Prospector Plans Bold Venture

Will Smash Way Through Trackless B.C. Timberland To Manson Creek

George W. Otterton, who has prospected in the creeks of Northern British Columbia for nearly 30 years and who has made several fortunes in his various mining ventures, is again prepared for his boldest venture into the unknown.

In the project announced by Mr. Williamson, three men will be lowered in a depth of 500 feet below the surface of the ocean in a steel ball-shaped chamber, from which heat-glass portholes they will study marine life.

A specially built schooner carrying the party of scientists who will perform the researches will sail from San Francisco within sixty days for the west coast of Mexico, where the first experiment is to be made, he said.

First of all, there is a complete drag line dredge having a daily capacity of 1,000 cubic yards, the largest piece of which weighs 12,000 pounds. This is only a part of the juggernaut which Mr. Otterton is hauling through the wilderness by motor tractor while an ox crew goes ahead preparing the way. Then there is a complete blacksmith, sawmill and machine outfit, kitchen equipment, steam boiler and engine and electric light plant, the latter to give Manson Creek some of the brilliance which it enjoyed in the days when it was the capital of the golden empire of the far north country.

Last year the caravan travelled 80 miles in four months. Then the team and the sleds were left where it could stand. And now that the snow is falling again the trok will be hauled by sleds.

Mr. Otterton expects to have his dredge sitting gold from the creek bed next summer.

President Coolidge Met British Warships

Cruisers Fired 21-Gun Salute When Yacht Was Sighted

That the British cruisers, the Caliope and the Calypso, reached Washington, their final destination, indicated the successful development of their program when they were met at the navy yard by the Mayflower, with President Coolidge aboard.

The Mayflower had just returned from a weekend cruise down the Potomac and the British warships gave Mr. Coolidge a 21-gun salute when the yacht was sighted as they rounded a bend in the river.

The president went to the bridge and with officers and men of all ships at attention the British cruisers steamed past the Mayflower the bands on the warships playing the "Star Spangled Banner" and the Mayflower band returning with "God Save the King."

Starts On Long Jaunt

New York Girl, Riding Horse To Los Angeles On Wager

In accordance with a \$2,000 wager with His Grace the Marquis of Donegal, a pretty 22-year-old girl, Miss Vionore Vigny, mounted her horse at the City Hall, New York, and set sail in a covered saddle for a long jaunt to Los Angeles, 3,011 miles distant as the bird flies.

Miss Vigny resented the Marquis' implication that America's women were a worthless lot with such heat that the conversation got down to cases. The Marquis, she said, proposed to wager \$5,000 that she personally could not ride a horse from New York to Los Angeles if she spent the rest of her life at it. She told him 139 days would be ample.

Honey Exports

With a honey production of 21,000,000 pounds in 1926, a record of 300 per cent increase for the past five years was recorded. Exports of honey from Canada in the twelve months ended June, 1927, had a value of \$19,433, as compared with a value of \$15,783 in the previous year, and with \$9,945 in the year before that. Germany is the principal customer, other purchasers being the United Kingdom, the United States and the Netherlands.

Saskatchewan Motor Licenses

According to the Saskatchewan Provincial Treasurer's report there has been a tremendous jump in the number of motor cars used in the province, from 10,225 in 1915, to 162,000 this year up to the end of August. Revenue from motor vehicle license fees the year ran to \$1,510,362; corporation tax to \$516,159,000, and railway tax \$349,000.

Don't marry him if he sits in his car and books instead of coming up to the door. He's the kind who will want hotel service in the home.

"You need cold compresses!" "Yesterday you said hot ones!" "Ah! Science has made much progress in the interval!"

Minard's Liniment for Lumbago.

Waaat Representation

Saskatchewan United Farmers Would Have Agricultural Interests Represented On Rail Board

Representation of organized agricultural interests on the Canada Board of Railway Commissioners is being asked by the United Farmers of Canada, Saskatchewan section, in a resolution passed by the executive board meeting at Saskatoon. A copy of this resolution has been sent to all western federal members of parliament. A vacancy will occur on the board through the expiration of the term of office of Commissioneer A. C. Boyce.

The resolution is as follows: "As a matter of justice and equity, we the executive board of the United Farmers of Canada, Saskatchewan section, strongly urge a reconstruction of the personnel of the railway commission so as to give the western provinces a more equal representation with Eastern Canada; and that one such appointee be representative of Western organized agricultural interests."

"Further that a copy of this resolution be sent to all western federal members with a view to soliciting their co-operation and support."

A similar resolution has also been passed asking representation of organized agricultural interests on the board of directors of the Canadian National Railways.

The resolution is as follows: "As a matter of justice and equity, we the executive board of the United Farmers of Canada, Saskatchewan section, strongly urge a reconstruction of the personnel of the railway commission so as to give the western provinces a more equal representation with Eastern Canada; and that one such appointee be representative of Western organized agricultural interests."

"Further that a copy of this resolution be sent to all western federal members with a view to soliciting their co-operation and support."

Major Lancot is a well-known authority on Canadian history, being a member of the Royal Society, president of the Folk Lore Society, and secretary of the Canadian Historical Association.

An Oil Of Merit. — Dr. Thomas' Electric Oil is a jumble of medicinal substances thrown together and put in a bottle, but the result of the scientific investigation of the healing qualities of certain oils as applied to the human body is a rare combination and it is no wonder it is in favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

It is wise to be certain that the oil used in any white painting you are having done is of good quality. The extra cost will be saved when it comes to keeping it clean.

Concealed His Identity

First and Second Essay Contest Prizes

Go To One Man

Anyone who has been curious to ascertain the identity of Louis Riel and Pierre Parent, who were announced as first and second prize winners in the essay contest conducted by the confederation jubilee committee, can be enlightened by the fact that these names were fictitiously employed by Major Gustave Lancot of the public archives.

Major Lancot is a well-known authority on Canadian history, being a member of the Royal Society, president of the Folk Lore Society, and secretary of the Canadian Historical Association.

An Oil Of Merit. — Dr. Thomas' Electric Oil is a jumble of medicinal substances thrown together and put in a bottle, but the result of the scientific investigation of the healing qualities of certain oils as applied to the human body is a rare combination and it is no wonder it is in favor from the first. The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and ease him of his pain. It's a rare medicine, but it's a good one.

It's the beauty of Castoria; its gentle action seems just what the doctor ordered. It does not harm the oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as you like, without fear; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle action seems just what the doctor ordered. It does not harm the oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as you like, without fear; it seems no time until everything is serene.

Just one warning: it is a genuine Fletcher's Castoria. That physician's name is well known. There is no such thing as a "Fletcher's Castoria" that is just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and cure of babies of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for

W. N. U. 1704

ASK FOR LOWER DUTY ON ALL COTTON GOODS

Ottawa.—That the tariff of cotton, yarn and cloth should be high enough to cover the wage bill of the industry but no higher, was the contention of R. J. Deachman, acting for the Consumers League of Canada in presenting to the tariff commission here an application for the reduction of duty on all cotton goods.

Quoting from reports issued by the Dominion Bureau of Statistics, Mr. Deachman gave the total value of the product in Canada as \$69,958,675, with wages paid amounting to \$18,964, or approximately 16 per cent, for the year 1924. The duties on the same commodities ranged from 20 per cent. to 35 per cent. under the general tariff.

Also G. Goffron, K.C., appearing for a group of manufacturers, in answering the brief of the consumers league, argued that Mr. Deachman's figures were not based on facts. The average salaries, he said, in 16 of the larger mills in Canada in 1924, amounted to 24.6 per cent., in 1923, to 23.3 per cent. Mr. Goffron also questioned the figures of total production.

J. R. K. Bristol, manager of the tariff department of the Canadian Manufacturers' Association, contended cotton entered into many products which were not shown under the tariff schedule of "Cotton" and that any application for reduced tariff affected many other industries. He submitted that those directing such industries had no warning of the application, Chairman W. H. Moore assured Mr. Bristol that there would be a second hearing.

Submitted To Privy Council

Saskatchewan and Alberta Wish To Appeal Ruling On Education Act

Ottawa.—The judicial committee of the Privy Council will be asked at its sitting next month in London for leave to appeal from the judgment of the Supreme Court of Canada upholding the constitutionality of the Alberta and, inferentially, the Saskatchewan Autonomy Act in respect to education.

Eugene Lafleur, K.C., for the government, has been asked to present the petition and will shortly leave for London. He sets forth that in view of the importance of the question a pronouncement by the Imperial Court of Last Resort is desirable.

The case, arising in connection with the return of Alberta's resources, is unique in that the government is really appealing from a decision in its own favor for the purpose, as indicated, of securing a judicial determination that will be final and absolute.

U.S. Giant Dirigible Will Visit Ottawa

British and American Officers To Make Trip in "Los Angeles"

Ottawa.—The giant United States dirigible "Los Angeles," with Sir Philip Snowden, British Under Secretary of State for Air, accompanied by a number of British and American officers on board, is to visit the capital on October 29, according to announcement from the Department of National Defence. The airship will take off from Lakehurst Field, N.J., at 8 a.m. October 29, arriving over Ottawa between 3 and 4 p.m. of the same day. A stop of about an hour is to be made here.

Faster Ships Practicable
Washington.—Construction of a fleet of fast passenger ships, twice the size of a destroyer and capable of making the trans-Atlantic trip to England in four days, is practicable, in the opinion of Chairman O'Connor, of the Shipping Board, who has witnessed tests of a 20-foot ship model at Washington navy yard. A speed of 35 knots was indicated by the tests.

None Face Trial
Winnipeg.—Earle Nelson, alleged strangler, now in jail here charged with the murder of two Winnipeg women, will be tried before Mr. Justice Dyas at the first court opening November 1. R. B. Graham, K.C., Crown prosecutor, will represent the crown, while J. H. Stitt will act on behalf of the prisoner.

British Prospects Bright
New York.—"England has turned the corner" and the outlook for the future is bright, declares H. Wickham Bled, editor of Review of Reviews, here today.

Ireland has a campaign for pure milk.

Police Forces To Co-operate

Dominion Government Will Not Consider Withdrawal Of R.C.M.P.

Ottawa.—While the Dominion government cannot for one minute consider the withdrawal of the Royal Canadian Mounted Police as agents of the Federal authority from the province of Saskatchewan as suggested in Press despatches from Regina, some arrangement may be arrived at between provincial and federal authorities whereby the R.C.M.P. and the Saskatchewan Provincial Police will co-operate in the enforcement of provincial statutes.

This was the statement of Hon. Ernest Lapointe, Minister of Justice, regarding the police situation in the prairie province. Hon. Mr. Lapointe stated that the press despatch conveyed no news to him since negotiations were under way last year between Saskatchewan authorities and himself as a result of the feeling at Regina that there was overlapping in provincial police work.

"There is no trouble. It is purely a matter of economy," the minister said. " Saskatchewan authorities want to avoid overlapping, and think that provincial matters affecting the enforcement of the law could be better handled by one force or by closer co-operation between the existing authorities."

The government has no idea of withdrawing any part of the R.C.M.P. anywhere, but we may be able to come to some arrangement with the gentlemen from the West at our meeting in the near future to ease the situation there."

Alberta Coal Strike

Minister Of Labor Offers His Services To Help End Dispute

Ottawa.—The assistance of the Department of Labor was offered to the parties of the Drumheller coal strike by Hon. Peter Heenan, Minister of Labor.

"As the law now stands," said the minister in an interview, "Alberta has not passed legislation to enable the federal department to administer the Industrial Disputes Act in that province. But Alberta has passed an Industrial Disputes Act of its own, and I am sure they will look after this particular trouble."

Mr. Heenan pointed out that six of the nine provinces had passed the enabling legislation which permitted the federal Industrial Disputes Act to function. Ontario, Quebec and Alberta are the three which have not adopted the necessary legislation.

Deny Charges Against Moscow Millionaires

Were Not Associated With Mission Says Former British Secretary

Ottawa.—The Daily Express quotes Edward Carnock, former secretary of the British Mission in Moscow, as denying that Kyril Prove, and Vladimir Prove, two former Moscow millionaires alleged to have supplied him with Red Army and navy mobilization plans, ever associated with the mis-

Scandals which followed the withdrawal of the British mission." Secretary Carnock, who is now in London, declared. "We are naturally concerned by the arrests because they mean almost certain death of scores of innocents."

According to the Daily Express, the charges also involve Sir Robert Hodgson, one time head of the mission and the former British consul at Lenin grad.

Hospital For Paralysis

Edmonton.—A temporary hospital for the care and treatment of infantile paralysis patients during the period of convalescence is to be established by the Provincial Government, according to announcement made here. Arrangements for getting the new hospital under way will be made as soon as a survey of the general situation with respect particularly to the likely number of cases, has been completed. Patients will be taken from all parts of the province.

A Second Cave-In

Sudbury, Ont.—A second cave-in at the Mond Nickel Company mine at Worthington has put the Canadian Pacific Railway division and the mine temporarily out of commission. The east bank of the cavity has slumped a distance of 100 feet, 20 feet in depth, but did not disrupt the roadway into the cavity. However the tracks are not considered safe for traffic as the ground has been undermined.

Believe Clue Found To Missing 'Planes

Rubber Ball Picked Up In Ocean Bears Number 218

St. John's, Nfld.—A report from Burgeo that a rubber ball had been picked up there, which was believed to have been dropped from an airplane, led to the hope that it might furnish some clue as to the yet unsolved fate of the trans-Atlantic planes, Whitehead and St. Raphael.

The ball, about two feet in diameter and made of an expensive material, was enclosed securely in a strong canvas bag. The numbers 226 and 17T, a little worn, could be seen on the rubber ball, but the report on the outside canvas was indistinct, although it looked as if it might have been London.

The number 218 on the canvas bag was very distinct.

Noted Schooner Sold

Ship On Which London Wrote "Sea Wolf" Bought For \$400

San Pedro, Cal.—A two-masted schooner, aboard which Jack London wrote his novel "The Sea Wolf," was sold under a United States' marshal's hammer for \$1,400 as the runnner-up. The schooner, which was known as the "Saucy Lass" when owned by the novelist, went to Mrs. Charman Conley Jones, of Los Angeles.

The run runner was seized in April on the coast of Lower California. She was built in Victoria, B.C., in 1892. Her latest registry was Panama, but this was cancelled by Panama after seizure.

CAREFUL DRYING OF WHEAT WILL SAVE MILLIONS

Winnipeg.—Important recommendations which probably will mean saving of millions of dollars in the marketing of this year's grain crop of Western Canada are contained in a tentative report submitted to the Board of Grain Commissioners by the grain research committee of the Canadian Research Council.

Owing to adverse weather conditions an immense amount of tough and damp grain is being threshed this year. This will necessitate careful drying. Last year a similar condition developed, and heavy discounts had to be made on European sales as a result of the general complaints regarding the quality of dried grain.

It is said that if the grain this year is properly dried, as recommended in the report, the grain losses sustained during the last season can be eliminated and they were estimated to total into the millions of dollars. Thus the producers will get the direct benefit.

With a view to preventing the recurrence of heavy losses this year, the grain research committee at the request of the Canadian Wheat Pool undertook to investigate the effect of drying on the quality of wheat last January.

GOVERNOR GENERAL AT JASPER

Their Excellencies the Governor General and Lady Willingdon, and the other members of the Vice-Regal party, enjoying a quiet holiday at Jasper National Park, posed for this informal photograph just before lunch. They had spent the morning golfing or on other outings. In the group are Mac-General E. A. Ashton, Robert H. Sun, and Mrs. Davis, and R. H. Kugli, acting superintendent of Jasper National Park, who were the luncheon guests of Their Excellencies on this occasion. Viscount and Lady Willingdon are seated on the steps in the center. Mrs. O'Brien is in the extreme left; next to her is Mrs. Ashton. Mrs. Davis is on the right of His Excellency and Mr. Kugli is seated beside Lady Willingdon. The Hon. Ruby Hardinge stands beside Mr. Kugli. In the front row, left to right, are: Mr. Davis, Capt. E. C. McEvilley, Lord Hardinge, Lady Hardinge, and General Ashton. —Photograph, Canadian National Railways.

Swims Across English Channel

Mercedes Fitzit, a London tyro, who is the first English woman to swim the English Channel. Despite the lateness of the season and a heavy fog she walked victoriously ashore at St. Margaret's Bay at 10 p.m., after having been in the water 16 hours and 15 minutes. Twice previously had she been swum by women both Americans.

Mercedes Fitzit, a London tyro, who is the first English woman to swim the English Channel. Despite the lateness of the season and a heavy fog she walked victoriously ashore at St. Margaret's Bay at 10 p.m., after having been in the water 16 hours and 15 minutes. Twice previously had she been swum by women both Americans.

Ontario Prefers Western Coal

Would Pay Higher Price If Necessary Opinion Of Premier Ferguson

Winnipeg.—There will be no amendment of the constitution and no tampering with the British North America Act arising out of the conference of provincial premiers, slated to open in Ottawa on Nov. 3, according to Hon. Howard Ferguson, premier of Ontario, who on his arrival in Winnipeg from a tour of the West, characterized the placing of such question on the conference agenda as "absurd."

"When we get through with it, I don't think it will be raised again for some time," he said, adding that the premiers had spoken during his trip of the same opinion as him self.

Referring to the question of Western coal for Ontario consumption, Mr. Ferguson said he believed the people of his province were willing to pay a bit more for the coal to produce the British North America Act gives the necessary authority. The act authorizes the Government to appoint "qualified persons," but is a woman a person within the meaning of the act? Or is the term person limited to a man?

The Government also has decided to apply to the Privy Council for leave to appeal on the question of Alberta's natural resources. Transfer of Alberta's resources was before the Supreme Court on a reference heard some time ago, and the court gave judgment. That judgment the Dominion Government now seeks to have taken to the Privy Council for a final ruling on the subject.

Remove Youthful King

Winnipeg.—Reports from Bucharest say that a case of cerebro-spinal meningitis has broken out at the Royal Palace at Sinaia, Rumania. As a precautionary measure young King Michael has been removed to the Carpathians.

Armitage Is Predicted

Chicago.—An armistice in Mexico's religious warfare will follow the presidential election there, Rev. Leopold Ruiz, exiled archbishop of Michoacan, predicted upon his arrival here.

FINAL PAYMENT ON POOL WHEAT IS ANNOUNCED

Winnipeg.—A final payment of over nineteen million dollars on the 1926 crop of Pool wheat, was announced by A. J. McPhail, president of the Canadian Wheat Pool.

"Of the total amount the Saskatchewan Pool receives \$12,293,207, the Alberta Pool, \$4,198,587, and the Manitoba Pool, \$2,085,575," stated Mr. McPhail.

"The total payment made by the Central Selling Agency to the three Provincial Pools represents the net amount after deducting all marketing costs incurred by the Central Selling Agency, the storage, interest charges, and administrative expenses from the proceeds of the 1926 crop."

"As in previous years the spreads between grades have been adjusted in the final payments which reflect the actual price secured for the various grades.

"The final payments make the total price on the principal grades as follows: Number one Northern, \$1.42; Number one Durum, \$1.45; Number two Northern, \$1.37½; Number three, \$1.31; Number four, \$1.21½; Number five, \$1.09; Number six, 97½."

Mr. McPhail stated that the carrying charges and operating expenses of the Provincial Pools are deducted from the final payment. In addition the provincial pools made deductions for the commercial and elevator reserves, which are credited to the individual members. Members receive interest on the money lent by them to their pool on an elevator reserve, which is used to provide elevator facilities.

The administrative expenses of the Central Selling Agency for the crop year of 1926-27, according to Mr. McPhail, were covered by a deduction of less than a fifth of a cent per bushel. The distribution of over nineteen million dollars brings the grand total paid by the pools since the Alberta Pool started in 1923 to over six hundred and seventy-million dollars.

Plan Aviation Program For Coming Year

New Flights and Exploration Trips Included In U.S. Project

New York.—Aviation has advanced a new year's boom program calculated to surpass the unprecedented achievement of the season now drawing to a close.

That program includes:

Building of new factories by Charles A. Levine and Arthur H. G. Polkett. Manufacturing by Levine of planes ranging from a "biplane," priced at \$1,500, to a multi-motored type for ocean travel.

An air expedition into the Arctic under command of General Noble, who is the chief of the North.

A trans-Atlantic flight by Clarence D. Chamberlin in a huge Belpine plane capable of transporting 20 persons.

Harry F. Guggenheim, Philadelphia, announced that he had created a fund to promote research work in the interest of aviation. The fund, it was announced, would be used to develop instruments which would reduce the hazards of flying.

A gold medal, to be awarded annually to the person who does the most to minimize the dangers of aviation, was announced by the Engineering Club of Philadelphia.

Women and the Senate

Question Of Eligibility Is To Be Submitted To Supreme Court

Ottawa.—The Government has decided to submit to the Supreme Court the question of whether women are eligible to sit in the Senate.

For some time past, women's organizations have been urging that any necessary legislation should be passed to enable women to sit in the Senate. The Senate is now to sit in the House of Commons. But there always has been some doubt as to whether the British North America Act gives the necessary authority. The act authorizes the Government to appoint "qualified persons," but is a woman a person within the meaning of the act? Or is the term person limited to a man?

The Government also has decided to apply to the Privy Council for leave to appeal on the question of Alberta's natural resources. Transfer of Alberta's resources was before the Supreme Court on a reference heard some time ago, and the court gave judgment.

That judgment the Dominion Government now seeks to have taken to the Privy Council for a final ruling on the subject.

Beam System Of Radio

CRUCIAL STAGE IS REACHED AT GENEVA MEET

Geneva.—The crucial stage of the international conference for the abolition of restrictions on imports and exports was reached today. Every country wants prohibitions removed in principle, but when it comes to practice it was evident from the discussions that the restrictions to be permitted by the convention may be so numerous that the document runs the risk of not meeting the requirements.

The German, French and United States delegations led the fight to produce what they called a "worth while" treaty. The struggle chiefly turned on Article V of the draft convention which authorizes governments to impose restrictions to meet extraordinary circumstances and to "protect vital economic and financial interests."

Hugh R. Wilson, United States delegate and minister to Switzerland, moved to strike out the phrase relative to economic and financial interests and to substitute the expression "in case of an exceptional calamity."

The question involved will go to committee for elaboration, and the new text will doubtless be a compromise.

The developments of the conference indicate that various countries wish to secure the removal of prohibitions against products of their particular countries.

Beam System Of Radio

Wm. Marconi Says It Is the Basis Of Future Improvements

Washington.—The beam system of radio transmission is the basis for all future wireless improvements, in the opinion of William Marconi, here as one of Italy's representatives at the international radio conference.

Upon its perfection, he believes, will depend to a large extent the development of such widely different wireless applications as photographic transmission and radio telephony.

Marconi, who has been instrumental in restricting radio emission to a beam diverging from the sending station at an angle of not more than two or three degrees. The effect of this, he continued, was that all energy of the transmitting station which under ordinary circumstances would have been spread in all directions was concentrated along this beam.

Owing to this concentration the strength of the incoming signal at the receiving station had been increased as much as 200 times in some cases. In trans-Atlantic communication between this country and England, he said the beam system had strengthened messages 100 times. To obtain the same strength of incoming signals without directional transmission the sending power would have had to be increased 10,000 times, which, Marconi added, would not have been feasible.

Since the success of radio telephony, which is dependent upon the strength of the incoming signal, Marconi declared he considered his experiments with beam transmission as a basic one for the improvement of the art.

Asked whether wireless would ever completely replace the cable, Marconi said the latter had only the advantage of secrecy, but that with the beam system secrecy is practically absolute in radio since words are transmitted at as high a rate as 500 per minute, requiring complicated and expensive receiving sets. In addition such messages are subject to reception only by stations in the direct part of the beam.

Survey Farm Lands

Alberta Government Will Secure Information About Land In North

Edmonton.—Arrangements are being made for a beginning at an early date on the survey of Northern rail way agricultural lands upon which the Provincial Government decided some time ago.

Six of the field men on the staff of the Department of Agriculture will go North some time this week. It is expected, for the purpose of making a general inspection of potential farm lands along the line of the E.P.R. and G.C. railroads. The purpose is to ascertain how much land now exists but capable of being profitably farmed to available for settlement.

The character of the soil, suitability for grain growing, ranching or mixed farming, transportation facilities and other like points will be covered by the survey, which will begin somewhere North of the present known and tested farming belt.

LODGE DIRECTORY

Blairmore Lodge No. 68, I. O. O. F.

Meets every third Tuesday at 8 p.m. in the Oddfellows Hall. Officers for the ensuing term: E. McSween, N.G.; W. Oliver, V.G.; J. B. Harmer, Secretary, Box 243.

Crowview Rebekah Lodge No. 66, I. O. O. F.

Meets the first and third Thursdays of the month at 8 p.m. Officers for the ensuing term: N.G., Sis. H. Patterson; V.G., Sis. J. R. Warner; Rec. Sec., Sis. C. A. Fraser.

Livingstone Lodge No. 22, KNIGHTS OF PYTHIAS.

Meets in the Castle Hall on the second and fourth Fridays of the month at 8 p.m. Officers for the ensuing term: C.G., T. J. Williamson; K. of R. & S. B. Sensier.

Blairmore Lodge No. 15, B. P. O. E.

Meets in the Castle Hall on the 2nd and 4th Tuesdays of each month at 8 p.m. Visitors made welcome. R. W. H. Pinkney, Exalted Ruler; J. R. McLeod, Secretary, Box 2033, Blairmore.

Fancy work of rare design, will be all along the line. C.W.L. Bazaar, November 15th.

A number of young people from Hillcrest enjoyed a very pleasant like to Passburg and return on Monday last.

Articles well chosen, stitches neatly done; will be on bargain tables on a Wednesday afternoon. C.W.L. Bazaar, November 15th.

About thirty members of the local lodge of Elks attended the regular meeting of Coleman lodge and the smoker following on Friday night last.

The Ladies' Aid of the United church are holding their annual Haloween tea and sale in the Elks' hall on Saturday, October 29th. Please remember the date.

Judge A. M. MacDonald, Dr. Oliver (Blairmore), Arthur Young and F. Perkins left Macleod this week on an extended hunting trip—Macleod Times, October 20.

Mr. Arthur Hadwell, of Bellevue, rendered several pleasing vocal selections at the anniversary concert of the United church at Pincher Creek on Wednesday night.

P. N. Potapoff, secretary-treasurer of the Christian Community of Universal Brotherhood of Alberta, Limited, was in town from Cowley on Tuesday.

During the week many subscribers to the Blairmore Enterprise called at the office and renewed their subscriptions. We appreciate their promptness.

On the occasion of the visit of Supreme Chancellor Witte and Supreme K. of R. and S. Love to Kimberley last Friday, the new Python hall there was dedicated.

Several new cages have been installed in local jails to accommodate overgrown kids that are likely to be caught in the act of damaging property on Haloween's night.

The Ladies' Aid of the United church are holding their annual Haloween tea and sale in the Elks' hall on Saturday, October 29th. Please remember the date.

Judge A. M. MacDonald, Dr. Oliver (Blairmore), Arthur Young and F. Perkins left Macleod this week on an extended hunting trip—Macleod Times, October 20.

A man recently fainted three times at his own wedding. It was no use, however. They waited until he came around the third time and continued the painful operation.

Calgary refers to Hon. R. B. Bennett, the new leader of the Conservative party as "Our Own R.B." Newspapers in New Brunswick also refer to him as "Our Own R.B."

Should old acquaintance be forgot, and never brought to mind? Should I not take in the Catholic Women's League Bazaar, Whether the day be bad or fine? (November 15th, Moose Hall).

Local and General Items

Dr. J. F. Miller, of Calgary, was accompanied here this week by Mrs. Miller.

Miss Florentine Houbregs has returned from a visit with her sister, Mrs. Wheatley, at Trail.

Twenty-one lives were lost when a film caught fire in a moving picture theatre in Finland on Sunday last.

A movement is on foot to have the United States congress provide an annuity of \$4000 for life for Col. Charles Lindberg.

A temple of the Princes of Syria, which is the junior order of the Knights of Pythias, was organized at Fernie on Saturday last.

We hate like the devil to be looked down upon, but that actually happens any time we visit Coleman and run across "Shorty" McKinnon.

Sam Giampetri appeared before the court a few days ago and was fined \$200 and costs for an infraction of the Alberta Liquor Control Act.

Keep in mind the Elks' annual dance, which will be held this year during the latter part of the last week in December. A good live committee are looking after the arrangements and guarantee that the dance will be the best yet. Watch for particulars.

Doomed

John and George, small sons of a Baptist minister, after listening to one of their father's sermons, decided that they must baptize their family cats. The kittens made no objection.

One by one they were put in a big tub of water. But when it came to the mother cat, she rebelled, and fought and scratched until at last John remarked: "Just sprinkle her, George, and let her go to hell!"

Mrs. A. M. Elliott, of Calgary, is the guest for a few days of Mrs. W. H. Pinkney.

Considerable kick is being registered by citizens of Pincher Creek over the lack of telegraphic service at the C.P.R. station on Sundays.

Rev. A. D. Currie, who for some weeks has been critically ill of pneumonia at Coleman, is, we are pleased to announce, now well on the road to recovery.

Harvey and his Red-Tux Boys, who are enroute through British Columbia, will give a dance in the Moose Hall tomorrow (Friday) night. See ad elsewhere.

Blairmore sheiks should beware. A chap down in Cleveland had to pay \$2200 last week for administering os-culation in the rear seat of a car. The lady's claim was for \$3657.

Remember to keep the date, November the 2nd, open. The members of Greenhill Temple, Pythian Sisters, will on that date hold their annual bazaar. Watch for further announcements.

Rev. J. McLean Beaton, who was induced to the pastoral charge of the Presbyterian church in Blairmore exactly fifteen years ago, and who for the past few years has been stationed at Thuro, Quebec, has been appointed pastor of the new United church at Corner Brook, Newfoundland.

What is said to be the fastest and most powerful locomotive in Europe, the King George V. of England's Great Western Railway, completed a 290-mile test run over the Baltimore & Ohio tracks and startled officials by one of them were put in a big tub of water. But when it came to the mother cat, she rebelled, and fought and scratched until at last John remarked: "Just sprinkle her, George, and let her go to hell!"

Mrs. F. R. Keer and little son arrived from Blairmore on a visit to her parents, Mr. and Mrs. C. J. Steen—Nanton, N.W.

The Rev. Neville Blunt was inducted as pastor of St. James Anglican church at Pincher Creek by His Lordship Bishop Sherman on Wednesday evening of last week. Ven. Archdeacon Swanson, of Lethbridge, attended the bishop.

After a deliberation by the jury of only thirty-eight minutes, Kenneth Roosevelt Bailey was on Friday afternoon last found guilty of the murder of Charles A. Jury, of Trail, on June the 24th last, and was sentenced to hang on January the sixth next.

Messrs. Bob Thompson, Roland Pinkney, Hughie Manson and Andy Hnatyshyn, reached Blairmore on Thursday afternoon from a pleasant motor trip to New York. The boys stated that every hour of the trip was thoroughly enjoyed.

All those who are desirous of joining the First Aid classes are asked to remember the meeting to be held in the general offices of the West Canadian Collieries, Limited, at 10:30 a.m. on Sunday, November the 6th, when the classes will be organized for the winter.

From the annual report of the Sovereign Grand Lodge, I.O.O.F., the following figures are gleaned: Present membership, including Rebekahs, 2,598,557; total relief paid in 1926, \$7,861,263.79; invested funds of grand and subordinate bodies, \$108,179,954.61. The above figures apply to the American order only.

For years there have been controversies about damage to farm lands from fumes of the Consolidated Mine Company's smelter at Trail, B.C. Now the company proposes to determine the extent of the damage by aerial photography. A Spokane flying concern has bought a \$1500 camera for the job and has photographed the 140 square miles about the smelter.
